Why Choose the 100 Airway/Lung/Face Shield Systems for Your Simulation Lab in India?

The 100 Airway/Lung/Face Shield Systems (Item No. 1005743 / W44568, MPN: 100-2141U / PP02141U / SB30997U) by Nasco Healthcare, USA is a 0.49 kg pack of 100 disposable airway/lung/face shield consumable units, designed for the compatible CPR training manikin W44592. The disposable face shield with integrated lung bag is the hygiene-critical consumable that enables multiple trainees to perform rescue breathing on the same manikin in sequence during a single training session — each trainee receives a fresh, sealed airway pathway, eliminating cross-contamination concerns during group CPR training.

For BLS certification centres, nursing colleges, schools, and corporate first-aid training programmes in India running high-volume group CPR sessions, a 100-count pack provides a substantial working stock that supports many training sessions before reordering is required. Each disposable system replaces both the face shield and the lung bag in a single unit, simplifying restocking between sessions — instructors do not need to track separate face shield and lung bag inventories. Only genuine OEM W44568 systems are guaranteed to fit the W44592 manikin's airway interface correctly, maintaining the correct seal and ventilation pathway that rescue breathing technique training depends on.
