DESCRIPTION (copy-paste into WordPress product description):

Why Choose the Mouth/Nose Pieces for CPR Simulator for Your Simulation Lab in India?

The Mouth/Nose Pieces for CPR Simulator (Item No. 1005734 / W44548, MPN: 100-2082U / PP02082U / SB24914U) by Nasco Healthcare, USA is a 0.91 kg pack of 10 genuine OEM replacement mouth/nose pieces for the Kyle™ CPR Manikin, 3-Year-Old (W44547 / 100-2951U). The mouth/nose piece is the hygiene-critical interface component for rescue breathing technique training — each trainee's mouth-to-mouth ventilation attempt contacts this surface directly, making regular replacement essential for hygienic group training sessions and between-session sanitation.

For PALS certification centres, schools, nursing institutes, and community CPR outreach programmes in India running regular 3-year-old CPR training sessions with multiple trainees on the Kyle™ manikin, maintaining a stock of W44548 mouth/nose pieces ensures sessions can proceed hygienically without delay. The pack of 10 provides a practical working buffer across several training sessions before reordering is required. Only genuine OEM W44548 pieces are guaranteed to fit the Kyle™ CPR Manikin's airway interface correctly, maintaining the correct seal geometry and ventilation pathway that rescue breathing technique training depends on. For the companion newborn Kim™ manikin (W44541), the compatible consumable is the Mouth/Nose Pieces for Resuscitation Manikin (1005729/W44542) — a different, non-interchangeable part.
