Product Description

10 mouth/nose pieces for baby resuscitation manikin (6-9 months) W44544

Why Choose the Mouth/Nose Pieces for Resuscitation Manikin for Your Simulation Lab in India?

The Mouth/Nose Pieces for Resuscitation Manikin (Item No. 1005732 / W44545, MPN: 100-2162U / PP02162U / SB24996U) by Nasco Healthcare, USA is a 0.53 kg pack of 10 genuine OEM replacement mouth/nose pieces for the Kevin™ CPR Manikin, 6- to 9-Month-Old (W44544 / 100-2976U). The mouth/nose piece is the hygiene-critical interface for rescue breathing technique training — each trainee's ventilation attempt contacts this surface directly, making regular replacement essential for safe, hygienic group training.

For PALS certification centres, nursing institutes, community CPR outreach programmes, and NRP training centres in India running regular 6- to 9-month-old infant CPR sessions with multiple trainees on the Kevin™ manikin, maintaining a stock of W44545 pieces ensures continuous hygienic operation without session delays. The 10-piece pack provides a working buffer across multiple training sessions before reordering. Only genuine OEM W44545 pieces guarantee the correct fit and seal on the Kevin™ airway interface — ensuring the ventilation pathway functions correctly during rescue breathing practice. These pieces are not interchangeable with the Kyle™ 3-year-old manikin consumable (W44548) or the Kim™ newborn consumable (W44542), which are separate, age-specific parts.
