Why Choose the 24 Airway Systems for Infant/Newborn CPR Manikins for Your Simulation Lab in India?

The 24 Airway Systems (Item No. 1005730 / W44543, MPN: 100-2905U / PP02905U / SB24910U) by Nasco Healthcare, USA is a 0.382 kg pack of 24 genuine OEM replacement airway systems compatible with the Kim™ CPR Manikin Newborn (W44541) and Kevin™ CPR Manikin 6-to-9-Month-Old (W44544). The airway system is the disposable component that maintains a hygienic, uncontaminated ventilation pathway for each trainee during infant and newborn CPR rescue breathing training — replacing it between trainees or training days eliminates cross-contamination without manikin disassembly or disinfection between

uses.

This is the infant/newborn-format airway system — the lightest (0.382 kg) and smallest of the three "24 Airway Systems" variants in this category, dimensioned specifically for the Kim™ (newborn) and Kevin™ (6–9 month) manikin airway interfaces. It is not interchangeable with the child-format airway system (W44549, for Kyle™ W44547) or the adult-format airway system (W44559, for W44552/W44597). For NRP training programmes, paediatric nursing institutes, and community CPR outreach programmes in India running regular infant and newborn CPR sessions on the Kim™ or Kevin™ manikins, a 24-pack provides a practical working stock across multiple training sessions. Only genuine OEM W44543 systems guarantee the correct fit and ventilation pathway performance on the W44541 and W44544 manikin airway interfaces.
