Life/form® Child CPR/Airway Management Torso

Item No. LF03633U
Weight 3.856kg
Make: Nasco Healthcare, USA

[Read More](#)

SKU:

Categories:BLS Child

Product Description

The CPR/Airway Management Torso is ideal for practicing intubation, ventilation, suctioning techniques, and CPR. This torso is designed to be the foundation of the Child CRiSis™ system as arms, legs, and a defibrillation chest skin can be added later to provide IV access, intraosseous infusions, blood pressure monitoring, and ECG recognition and defibrillation training. Includes pump lubricant.

Why Choose the Life/form® Child CPR/Airway Management Torso for Your Simulation Lab in India?

The Life/form® Child CPR/Airway Management Torso (Item No. LF03633U / 1018865) by Nasco Healthcare, USA is a 3.856 kg 5-year-old child CPR and basic airway management training torso — and the foundation of the Life/form® Child CRiSis™ system. From the comparison table, this is the

entry-level torso in the two-torso CPR/Airway range: standard intubation, ventilation, and CPR without the advanced airway features, defibrillation, or vascular access present in the Advanced Child CPR/Airway Management Torso with Defibrillation Features (LF03763U / 1018864). The defining value of this torso is its scalability — arms with IV access, legs with intraosseous infusion, a blood pressure monitoring arm, and a defibrillation chest skin can all be added later, converting this base torso into a progressively more capable Child CRiSis™ system without replacing the core unit. For NMC-mandated simulation labs, PALS training centres, and nursing institutes in India that need a cost-effective starting point for a scalable paediatric simulation platform, this torso is the correct foundation to build on. Includes pump lubricant. A downloadable user manual and demonstration video are available on the product page.

The torso supports intubation, ventilation, suctioning, and CPR — the core PALS procedural skill set on a 5-year-old child patient. It is compatible with supraglottic airway devices for extended airway management training, and the pump lubricant included maintains the airway in optimal training condition. The Child CRiSis™ upgrade path means simulation labs that start with this foundation torso can add IV access arms, IO legs, blood pressure monitoring, and a defibrillation chest skin when training programme requirements expand — without investing in a full advanced torso at the outset. For programmes that need all seven capabilities from day one (digital intubation, tongue oedema, laryngospasm, stomach rise, suctioning, carotid pulse, and defibrillation), the Advanced Child CPR/Airway Management Torso with Defibrillation Features (LF03763U) is the correct choice.

Why Buy from SEM Trainers? SEM Trainers & Systems is an authorized distributor of Nasco Healthcare products in India with over 30 years of experience supplying medical simulators to 1,500+ institutions across 28 states. We provide pan-India delivery, on-site installation, faculty orientation, and dedicated after-sales support. All products carry genuine manufacturer warranty and meet ISO 9001 quality standards.

Frequently Asked Questions

Q: What can be added to this torso to expand its capability? A: This is the foundation of the Life/form® Child CRiSis™ system. Arms with IV access, legs with intraosseous infusion capability, a blood pressure monitoring arm, and a defibrillation chest skin can all be added at any time to expand the training capability without replacing the core torso.

Q: How does this differ from the Advanced Child CPR/Airway Management Torso with Defibrillation (LF03763U)? A: LF03763U includes all seven advanced capabilities — digital intubation, tongue oedema, laryngospasm, stomach rise, suctioning, manual carotid pulse, and defibrillation — from the outset. LF03633U is the base CPR and basic airway torso with no advanced airway or defibrillation features, designed for programmes that want to start with a scalable foundation.

Q: What is the warranty and how do I get support? A: All Nasco Healthcare products carry standard

manufacturer warranty. For support, reach us at sem@semtrainers.com or call +91-88495 63724.

Manikin can be used with Supraglottic airway devices for airway training.

	Head/torso	Age	Digital intubation	Tongue edema	Laryngospasm	Stomach rise	Suctioning	Manual carotid pulse	Defibrillation	Additional features
NG Tube Insertion Trainer Item No: 1017250	head mounted on a board	1-year old	-	-	-	Yes	-	-	-	trainer for instruction of nasogastric tube insertion and care
Infant Airway Simulator Item No: 1018863	full-body	1-year old	-	-	-	-	Yes	-	-	chest cavity containing realistic organs, nasal passage permits placement of NP tube
Infant Airway Trainer Item No: 1017954	head mounted on a board	1-year old	-	-	-	Yes	Yes	-	-	accepts 4.0 mm endotracheal tubes
Infant Intubation Head Item No: 1017245	head mounted on a board	1-year old	-	-	-	-	Yes	-	-	accepts 2.5 mm endotracheal tubes
Advanced Infant Intubation Head Item No: 1017236	head mounted on a board	1-year old	-	Yes	-	Yes	Yes	-	-	Vocal cords are highlighted for easy viewing
Airway Management Trainer Item No: 1014201	head mounted on a board	3-year old	-	-	-	-	Yes	-	-	accepts 4.0 mm endotracheal tubes

Advanced Child Airway Management Trainer <i>Item No:</i> 1019787	head	5-year old	-	Yes	Yes	-	Yes	Yes	-	can be attached to any of the Life/form® Child Airway Management Trainers or Child CRiSis Manikins
Child Airway Management Trainer Head Item <i>No:</i> 1019788	head	5-year old	-	-	-	Yes	Yes	Yes	-	can be attached to any of the Life/form® Child Airway Management Trainers or Child CRiSis Manikins
Advanced Child Airway Management Trainer <i>Item No:</i> 1005698	head mounted on a board	5-year old	Yes	Yes	Yes	Yes	Yes	Yes	-	also allows for E.T., E.O.A., P.T.L., L.M.A., E.G.T.A., Combitube®, and King System insertion
Basic Child CPR/ Airway Management Torso™ <i>Item No:</i> 1018865	torso	5-year old	-	-	-	-	-	-	-	This torso is the foundation of the Child CRiSis™ system as arms, legs, and a defibrillation chest can be added later.

Advanced Child CPR/Airway Management Torso <i>Item No:</i> 1018864	torso	5-year old	Yes	Yes	Yes	Yes	Yes	Yes	Yes	also allows for E.T., E.O.A., P.T.L., L.M.A., E.G.T.A., Combitube®, and King System insertion
