SKU:

Categories:BLS Child

Product Description

The comprehensive design allows for practice of Heimlich maneuver and abdominal thrusts, as well as CPR and mouth-to-mouth breathing. Realistic anatomical markings (Adam's apple, carotid arteries, navel, rib cage, chest notch) make it easy to learn correct hand placement for checking pulse, performing chest compressions, and more. Provides valuable student feedback and other important features: • Head tilt/chin lift required to open airway • Proper anatomical landmarks • Audible compression "clicker" to ensure proper technique Easy-to-clean heads are dishwasher safe and can easily be sanitized. Lung bags are replaceable. Designed to meet American Heart Association criteria for desirable manikin features. Packed in a rugged cardboard carrying case with a supply of 10 face-

shield lung bags and an insertion tool.

Why Choose the CPR Prompt® Adult/Child Manikin for Your Simulation Lab in India?

The CPR Prompt® Adult/Child Manikin (Item No. 1017939 / W44713, MPN: LF06001U) by Nasco Healthcare, USA is a 2.5 kg adult/child CPR training manikin designed to meet American Heart Association criteria for desirable manikin features — covering CPR, mouth-to-mouth rescue breathing, and Heimlich manoeuvre and abdominal thrust technique training on a single platform. For BLS certification centres, nursing colleges, schools, corporate first-aid training programmes, and community CPR outreach in India that need a single-unit adult/child manikin combining choking response and cardiac arrest response training with built-in compression depth feedback, this is the correct platform. Packed in a rugged cardboard carrying case with 10 face-shield lung bags and an insertion tool.

The audible compression clicker provides depth feedback with every chest compression, sounding when the trainee achieves the correct compression depth — the most direct single feedback mechanism available on a passive manikin for calibrating compression force without electronic monitoring. This distinguishes the CPR Prompt® from manikins that provide no compression depth feedback, making it suitable for introductory CPR courses where trainees are calibrating technique for the first time. Realistic anatomical landmarks — Adam's apple, carotid arteries, navel, rib cage, and chest notch — provide the surface reference points for correct hand placement during pulse checking, chest compressions, and Heimlich abdominal thrusts. Head tilt/chin lift is required to open the airway before ventilation succeeds, ensuring correct airway positioning is trained as a precondition for effective rescue breathing. The dishwasher-safe head can be sanitised between trainee uses; replaceable lung bags maintain hygienic ventilation practice across sessions. For group training requiring multiple simultaneous stations, the CPR Prompt® Adult/Child Manikin 5 Pack (W44712) provides five units in a single nylon carry case.

Why Buy from SEM Trainers? SEM Trainers & Systems is an authorized distributor of Nasco Healthcare products in India with over 30 years of experience supplying medical simulators to 1,500+ institutions across 28 states. We provide pan-India delivery, on-site installation, faculty orientation, and dedicated after-sales support. All products carry genuine manufacturer warranty and meet ISO 9001 quality standards.

Frequently Asked Questions

Q: Does this manikin provide compression depth feedback? A: Yes. An audible clicker sounds when the trainee achieves the correct compression depth — providing immediate tactile and audible feedback on compression technique without electronic monitoring.

Q: Does this manikin support choking response training? A: Yes. The CPR Prompt® Adult/Child Manikin supports Heimlich manoeuvre and abdominal thrust technique training in addition to CPR and

mouth-to-mouth rescue breathing.

Q: What is the warranty and how do I get support? A: All Nasco Healthcare products carry standard manufacturer warranty. For support, reach us at sem@semtrainers.com or call +91-88495 63724.
