**Categories:**BLS Child

### Product Description

The comprehensive design allows for practice of Heimlich maneuver and abdominal thrusts, as well as CPR and mouth-to-mouth breathing. Realistic anatomical markings (Adam's apple, carotid arteries, navel, rib cage, chest notch) make it easy to learn correct hand placement for checking pulse, performing chest compressions, and more. Provides valuable student feedback and other important features: • Head tilt/chin lift required to open airway • Proper anatomical landmarks • Audible compression "clicker" to ensure proper technique Ideal for group training, allowing every student to have their own manikin. Easy-to-clean heads are dishwasher safe and can easily be sanitized. Lung bags are replaceable. Designed to meet American Heart Association criteria for desirable manikin features. Packed in a rugged nylon carrying case with a supply of 50 face-shield lung bags and an

insertion tool.

## **Why Choose the CPR Prompt® Adult/Child Manikin 5 Pack for Your Simulation Lab in India?**

The CPR Prompt® Adult/Child Manikin 5 Pack (Item No. 1017940 / W44712, MPN: LF06100U) by Nasco Healthcare, USA is a 9.5 kg set of five CPR Prompt® Adult/Child Manikins packed in a rugged nylon carrying case with 50 face-shield lung bags and an insertion tool — designed specifically for group training where every student has their own manikin simultaneously. For BLS certification centres, nursing colleges, schools, corporate first-aid training programmes, and community CPR outreach in India running group sessions, the one-manikin-per-trainee format eliminates the rotation queue that limits hands-on practice time when a single manikin is shared across a group, and maximises the total compression, ventilation, and Heimlich technique repetitions each trainee achieves per session.

Each manikin in the set carries the complete CPR Prompt® Adult/Child feature set: Heimlich manoeuvre and abdominal thrust technique training alongside CPR and mouth-to-mouth rescue breathing; audible compression clicker that sounds at correct compression depth; realistic anatomical landmarks (Adam's apple, carotid arteries, navel, rib cage, chest notch) for correct hand placement training; head tilt/chin lift required to open the airway before ventilation; dishwasher-safe head for easy sanitisation between trainees; and replaceable lung bags. The AHA-compliant design ensures the manikins meet the criteria for desirable features in a CPR training manikin. The 50 face-shield lung bags provide 10 per manikin as a working buffer — five times the consumable supply of the single-unit cardboard pack (W44713) — before reordering. The nylon carry case stores and transports all five manikins as a single unit, making this the most practical format for training coordinators running sessions across multiple venues.

**Why Buy from SEM Trainers?** SEM Trainers & Systems is an authorized distributor of Nasco Healthcare products in India with over 30 years of experience supplying medical simulators to 1,500+ institutions across 28 states. We provide pan-India delivery, on-site installation, faculty orientation, and dedicated after-sales support. All products carry genuine manufacturer warranty and meet ISO 9001 quality standards.

### **Frequently Asked Questions**

**Q: What is the difference between this 5-pack and the single CPR Prompt® Adult/Child Manikin (W44713)?** A: The feature set on each manikin is identical. The 5-pack provides five manikins in a nylon carry case with 50 face-shield lung bags — one manikin per trainee for group training. The single unit (W44713) comes in a cardboard case with 10 lung bags.

**Q: How many face-shield lung bags are included?** A: 50 face-shield lung bags and one insertion tool are included for the set of five manikins — 10 per manikin.

**Q: What is the warranty and how do I get support?** A: All Nasco Healthcare products carry standard

manufacturer warranty. For support, reach us at [sem@semtrainers.com](mailto:sem@semtrainers.com) or call +91-88495 63724.
