Why Choose the Kyle™ CPR Manikin, 3-Year-Old – Light for Your Simulation Lab in India?

The Kyle™ CPR Manikin, 3-Year-Old – Light (Item No. 100-2951U / 1005733 / W44547) by Nasco Healthcare, USA is a 2.765 kg, 82 × 24 × 15 cm economically priced light skin tone 3-year-old child CPR training manikin — the oldest patient age configuration in the 7-model Nasco paediatric CPR family, and the only Kyle™ configuration at this age. Foam-filled construction with no internal parts to break ensures long-term durability across high-volume group training use. A downloadable user manual is available on the product page. From the family comparison table: CPR ?, disposable airway ?, carrying bag ? — no arterial pulse sites, no OMNI®, no IO, no femoral venous. For PALS certification centres, schools, first-aid training programmes, paediatric nursing institutes, and community CPR outreach in India that train specifically on 3-year-old child patient CPR — where one-handed compression technique and child-proportion airway management replace infant two-finger technique — Kyle™ is the correct and only economy platform at that patient age.

The airway cutoff mechanism requires correct head tilt/chin lift positioning before ventilation succeeds — training the airway opening step as a non-negotiable precondition rather than an optional gesture. This is the key training differentiator from infant manikins where head positioning is also critical but anatomically different. Individual mouth/nose pieces and a completely disposable airway system with non-rebreathing valve provide hygienic multi-trainee ventilation practice without cross-contamination. The 82 cm length correctly represents a 3-year-old child patient's proportions, positioning trainees at the correct working distance and hand placement zone for one-handed paediatric chest compression

technique. A carrying bag is included for storage and transport between training venues. The light skin tone variant is complemented by the dark skin tone variant; contact SEM Trainers for dark skin tone availability.

Why Buy from SEM Trainers? SEM Trainers & Systems is an authorized distributor of Nasco Healthcare products in India with over 30 years of experience supplying medical simulators to 1,500+ institutions across 28 states. We provide pan-India delivery, on-site installation, faculty orientation, and dedicated after-sales support. All products carry genuine manufacturer warranty and meet ISO 9001 quality standards.

Frequently Asked Questions

Q: What CPR hand technique does this manikin train for? A: Kyle™ trains one-handed heel-of-hand compression technique for a 3-year-old child — distinct from the two-finger infant technique (Kim™, Kevin™) and two-handed adult technique. The airway cutoff confirms correct head tilt/chin lift before ventilation.

Q: Is a dark skin tone version available? A: Yes. Kyle™ is available in both light and dark skin tones. Contact us at sem@semtrainers.com or +91-88495 63724 for the dark skin tone variant.

Q: What is the warranty and how do I get support? A: All Nasco Healthcare products carry standard manufacturer warranty. A downloadable user manual is available on the product page. For support, reach us at sem@semtrainers.com or call +91-88495 63724.
