Categories:BLS Child

Product Description

Economically priced, this manikin of a 6 to 9 month old baby has a lightweight, rugged, foam filled body with no internal parts to break. Features include:

- Lifelike anatomical landmarks such as nipples, xiphoid process and sub-sternal notch
- Easy to replace mouth/nose pieces
- Disposable airways with uni-directional valves
- Soft carrying bag

Why Choose the Kevin™ CPR Manikin, 6- to 9-Month-Old for Your Simulation Lab in India?

The Kevin™ CPR Manikin, 6- to 9-Month-Old (Item No. 100-2976U / 1005731 / W44544) by Nasco Healthcare, USA is a 1.85 kg, 66 × 20.3 × 20.3 cm economy infant CPR training manikin — the second

configuration in the 7-model Nasco paediatric CPR manikin family, bridging the age gap between the Kim™ newborn and the 1-year-old Pediatric Care Simulator configurations. From the family comparison table: CPR ?, disposable airway ?, soft carrying bag ? — no arterial pulse sites, no OMNI®, no IO, no femoral venous. Foam-filled body construction with no internal mechanical parts to break ensures durability across high-volume group training use. A downloadable user manual is available on the product page. For NRP training programmes, PALS certification centres, nursing institutes, and community CPR outreach in India that train specifically on 6- to 9-month-old infant patient proportions — the age group that bridges newborn and 1-year-old infant CPR technique — Kevin™ is the only configuration in the family at that patient age.

Lifelike anatomical landmarks — nipples, xiphoid process, and sub-sternal notch — provide the correct surface reference points for infant CPR: the two-finger compression technique on the lower sternum (below the nipple line, above the xiphoid) that is correct for this patient age. Easy-to-replace mouth/nose pieces maintain hygienic ventilation practice across multiple trainees. Disposable airways with uni-directional valves prevent cross-contamination during group training sessions. A soft carrying bag is included for storage and transport between venues. For training coordinators building a multi-age paediatric CPR programme, Kevin™ (6–9 months) pairs with Kim™ (newborn, 1005728/W44541) at the infant end, and with the Pediatric Care Simulator (1-year-old, S111.M / 1017541) and Kyle™ (3-year-old, W44547 / 1005733) at the child end — covering four patient age groups with consistent build quality and consumables.

Why Buy from SEM Trainers? SEM Trainers & Systems is an authorized distributor of Nasco Healthcare products in India with over 30 years of experience supplying medical simulators to 1,500+ institutions across 28 states. We provide pan-India delivery, on-site installation, faculty orientation, and dedicated after-sales support. All products carry genuine manufacturer warranty and meet ISO 9001 quality standards.

Frequently Asked Questions

Q: What patient age does Kevin™ simulate? A: Kevin™ simulates a 6- to 9-month-old infant — the age group between the newborn Kim™ and the 1-year-old Pediatric Care Simulator in the Nasco paediatric CPR family.

Q: Does Kevin™ include arterial pulse sites or vascular access? A: No. Kevin™ supports CPR and disposable airway training only. For arterial pulse assessment, IO access, and femoral venous access, the 1-year-old Pediatric Care Simulator (1014176) or CPR Patient Simulator with OMNI® (1020115) are the appropriate upgrade configurations.

Q: What is the warranty and how do I get support? A: All Nasco Healthcare products carry standard manufacturer warranty. A downloadable user manual is available on the product page. For support, reach us at sem@semtrainers.com or call +91-88495 63724.
