CPR and Trauma Child Care Simulator, 5 years old

Item No. 1022059
Weight 0.99kg
MPN: S153.M

[Read More](#)

SKU:

Categories:BLS Child

Product Description

This anatomically accurate representation of a school age child is a perfect training tool for basic life support such as CPR and trauma care. Some features:

- Fully articulating head and jaw with teeth and tongue
- Individual disposable airways to practice hygienic mouth-to-mouth ventilation
- Airway blocked when head is forward
- Easily accessible chest cavity with molded rib cage, lungs, and heart
- Realistic chest rise during ventilation
- Carotid, femoral, and brachial arterial pulse sites Comes with T-shirt and shorts, custom nylon carrying bag, and instruction manual.

Why Choose the Gaumard CPR and Trauma Child Care Simulator, 5 Years Old for Your Simulation Lab in India?

The Gaumard CPR and Trauma Child Care Simulator, 5 Years Old (Item No. 1022059, MPN: S153.M) by Gaumard Scientific, USA is a full-body anatomically accurate school-age child simulator — the 4th configuration in the 6-model BLS Child family — adding intraosseous access and femoral venous access to the full-body CPR, pulse assessment, and disposable airway platform of the CPR Patient Simulator (1013815). From the family comparison table, this is the most complete non-OMNI configuration: CPR ?, disposable airway ?, carotid/femoral/brachial arterial pulse sites ?, intraosseous access ?, femoral venous access ?. For PALS training centres, paediatric emergency medicine departments, and NMC-mandated simulation labs in India that need to combine CPR, vascular access, and IO technique training on a 5-year-old full-body platform — without the OMNI® Code Blue monitoring pack — this is the correct configuration. Supplied with T-shirt and shorts, custom nylon carrying bag, and instruction manual.

The fully articulating head and jaw — with teeth and tongue — enables realistic head tilt/chin lift and jaw thrust technique training as preconditions for effective ventilation. The individual disposable airways provide hygienic mouth-to-mouth rescue breathing practice with no cross-contamination between trainees. The airway is blocked when the head is in the forward position, reinforcing correct head positioning as a non-negotiable step before ventilation. Realistic chest rise during ventilation confirms effective rescue breathing technique. The easily accessible chest cavity with moulded rib cage, lungs, and heart provides realistic anatomy for CPR hand placement and compression training. Three arterial pulse sites — carotid, femoral, and brachial — enable pulse assessment training at all three clinically relevant locations during paediatric resuscitation. Intraosseous access adds IO needle insertion and infusion technique training on the same full-body platform. Femoral venous access adds central venous cannulation via the femoral route. For programmes that also need OMNI® Code Blue real-time monitoring, the CPR and Trauma Care Simulator with OMNI® (1017539) is the upgrade configuration.

Why Buy from SEM Trainers? SEM Trainers & Systems is an authorized distributor of Gaumard Scientific products in India with over 30 years of experience supplying medical simulators to 1,500+ institutions across 28 states. We provide pan-India delivery, on-site installation, faculty orientation, and dedicated after-sales support. All products carry genuine manufacturer warranty and meet ISO 9001 quality standards.

Frequently Asked Questions

Q: What vascular access procedures does this simulator support? A: Carotid, femoral, and brachial arterial pulse assessment, intraosseous (IO) needle insertion and infusion, and femoral venous access — covering the primary vascular access routes in paediatric resuscitation.

Q: Does this simulator include the OMNI® Code Blue pack? A: No. This configuration does not include OMNI®. For real-time CPR quality monitoring via the OMNI® Code Blue pack, see the CPR and Trauma Care Simulator with OMNI® (1017539).

Q: What is the warranty and how do I get support? A: All Gaumard Scientific products carry standard manufacturer warranty. For support, reach us at sem@semtrainers.com or call +91-88495 63724.
