Product Description

3 lungs and stomachs for infant intubation trainer W44593 and small child intubation trainer W44594 **Lungs and Stomachs for Intubation Head (Item No. 101-121)** is an official replacement consumable pack from Nasco Healthcare, USA, designed to keep your paediatric intubation trainers in continuous, simulation-ready condition.

The pack contains **3 sets of lungs and stomachs**, purpose-built as direct replacements for:

- **Infant Intubation Head (W44593)** — 1-year-old infant simulator
- **Small Child Intubation Head (W44594)** — 3-year-old child simulator

Key Features:

- Genuine OEM replacement parts — exact fit, no modification required
- Maintains realistic feel and function for intubation and ventilation practice
- Ensures correct stomach rise simulation for confirming proper tube placement
- Pack of 3 sets — cost-effective for high-volume training labs
- Lightweight (8g) — easy to stock as lab consumables

Ideal For:

- Medical college skills labs and nursing institutes running regular paediatric airway training
- NMC/INC-compliant simulation centres requiring ongoing consumable replenishment
- Skills lab coordinators managing preventive maintenance of Nasco intubation trainers
- PALS, BLS, and paediatric nursing training programmes

Specification	Detail
Item No.	101-121
Pack Contents	3 sets of lungs and stomachs
Compatible With	W44593 (Infant Intubation Head), W44594 (Small Child Intubation Head)
Weight	0.008 kg
Make	Nasco Healthcare, USA

Q: What trainers are these lungs and stomachs compatible with? A: They are specifically designed for the Infant Intubation Head (W44593) and the Small Child Intubation Head (W44594), both manufactured by Nasco Healthcare, USA.

Q: How many sets are included in one pack? A: Each pack contains 3 complete sets of lungs and stomachs.

Q: Why do I need to replace lungs and stomachs? A: With repeated intubation practice, the lung and stomach components experience wear that affects realism and function. Regular replacement ensures accurate stomach rise feedback and a proper feel for tube placement confirmation — critical for effective training outcomes.

Q: Are these genuine OEM parts or third-party alternatives? A: These are genuine Nasco Healthcare OEM replacement parts, ensuring a perfect fit and authentic simulation performance with your existing trainer.

Q: How often should these be replaced? A: Replacement frequency depends on usage intensity. High-volume labs running daily sessions typically replace components every few months. SEM

Trainers recommends stocking at least one spare pack per trainer for uninterrupted lab operations.

Q: Can these be used with any other intubation trainer models? A: These are designed specifically for W44593 and W44594. For other Nasco intubation trainers, different replacement part numbers apply — contact SEM Trainers to confirm compatibility.

Q: Is this product available for bulk procurement or institutional orders? A: Yes. SEM Trainers supplies consumables and spare parts to medical colleges, nursing institutes, and AYUSH institutions across India, including through the GeM portal for government procurement.
