Infant Airway Management Trainer, Head Only

Item No. LF03621U

Weight 1.13kg

Dimensions 23 x 23 x 15 cm

Make: Nasco Healthcare, USA

[Read More](#)

SKU:

Categories:Airway Management Child

Product Description

The infant head has the ability to be attached to your Resusci Baby or Life/form Crisis Baby. Features realistic size and anatomy and is perfect for practicing airway management skills on an infant. Comes with a pump spray lubricant. This product can be used on its own or added to the [Resusci Baby](#) (W19621 / 1017684) or [Life/form Crisis Baby](#) (W44717/1017248) *Resusci® Baby is a trademark of the

Laerdal Medical Corporation.

Why Choose the Life/form® Infant Airway Management Trainer, Head Only for Your Simulation Lab in India?

The Life/form® Infant Airway Management Trainer, Head Only (Item No. LF03621U / 1017953) by Nasco Healthcare, USA is a 1.13 kg realistic infant airway management training head — 23 × 23 × 15 cm — designed for infant airway management skill practice as a standalone unit or as an add-on airway head for the Life/form® CRiSis™ Baby Manikin (W44717 / 1017248). Pump spray lubricant is included. For NRP training programmes, nursing institutes, paediatric skills labs, and NMC-mandated simulation labs in India that need a dedicated infant airway training head — either standalone for airway technique practice or integrated with the CRiSis™ Baby for combined CPR and airway training — this is the correct and most flexible infant airway head option in the Nasco range.

The head features realistic infant size and anatomy for accurate airway management training at infant proportions — the critical scale difference from child and adult trainers that trainees must experience to develop correct infant intubation technique, blade selection, and hand positioning. The realistic anatomy enables oral and nasal intubation technique training and BVM ventilation practice at the correct infant anatomy scale. When attached to the Life/form® CRiSis™ Baby Manikin, the combined platform enables instructors to run integrated infant CPR and airway management sessions — switching between resuscitation and airway management training scenarios on the same manikin without changing platforms. As a standalone head it is the lightest and most portable infant airway trainer in the Nasco range at 1.13 kg, suitable for outreach training and skills fair demonstrations.

Why Buy from SEM Trainers? SEM Trainers & Systems is an authorized distributor of Nasco Healthcare products in India with over 30 years of experience supplying medical simulators to 1,500+ institutions across 28 states. We provide pan-India delivery, on-site installation, faculty orientation, and dedicated after-sales support. All products carry genuine manufacturer warranty and meet ISO 9001 quality standards.

Frequently Asked Questions

Q: Which manikins is this head compatible with? A: LF03621U can be used as a standalone head or attached to the Life/form® CRiSis™ Baby Manikin (W44717 / 1017248) by Nasco Healthcare. Contact us to confirm compatibility with your specific configuration before ordering.

Q: Is a stand or board included? A: No. This is a head-only unit supplied with pump spray lubricant. It is used standalone on a flat surface or attached to the CRiSis™ Baby Manikin.

Q: What is the warranty and how do I get support? A: All Nasco Healthcare products carry standard manufacturer warranty. For support, reach us at sem@semtrainers.com or call +91-88495 63724.
