Child Intubation Head

Item No. 101-125U
Weight 1.06kg
Dimensions 36 x 20 x 18 cm
Make: Nasco Healthcare, USA

[Read More](#)

SKU:

Categories: Airway Management Child

Product Description

This trainer of a 3 year old child allows practice and training of nasal and oral intubation. Features include: • Inflatable lungs and stomach • Vocal cords are highlighted in white for easy laryngoscope viewing • Anatomical landmarks such as uvula, vocal cords, glottis, epiglottis, larynx, arytenoid cartilage, trachea, oesophagus.

Why Choose the Life/form® Child Intubation Head for Your Simulation Lab in India?

The Life/form® Child Intubation Head (Item No. 101-125U / 1014201) by Nasco Healthcare, USA is a 1.06 kg board-mounted paediatric intubation training head simulating a 3-year-old child — 36 x 20 x 18 cm — and the only 3-year-old configuration in the Life/form® child airway management range. From the comparison table, it supports suctioning with inflatable lungs and stomach, and accepts 4.0 mm endotracheal tubes. For simulation labs, nursing colleges, paediatric anaesthesia departments, and

NMC-mandated skills labs in India that specifically need a 3-year-old patient for paediatric intubation training — bridging the age gap between the 1-year-old infant trainers and the 5-year-old child trainers — this is the only Life/form® option at that patient age. Supplied with carrying bag and lubricant. A downloadable user manual is available on the product page.

The vocal cords are highlighted in white for easy laryngoscope viewing — a deliberate design choice that makes correct blade placement and cord identification visible to both trainee and instructor simultaneously during laryngoscopy in classroom settings. This is particularly useful during introductory paediatric intubation training where trainees are still developing the visual recognition skills needed for correct blade positioning. Anatomical landmarks present include uvula, vocal cords, glottis, epiglottis, larynx, arytenoid cartilage, trachea, and oesophagus — the full set for oral and nasal intubation technique training at 3-year-old proportions. Inflatable lungs provide visible chest rise confirmation of correct tracheal placement; the inflatable stomach bladder confirms oesophageal intubation. Suctioning technique training is supported. This trainer does not include tongue oedema, laryngospasm, digital intubation, or manual carotid pulse — those capabilities are available on the 5-year-old Advanced Child Airway Management Trainer (LF03762).

Why Buy from SEM Trainers? SEM Trainers & Systems is an authorized distributor of Nasco Healthcare products in India with over 30 years of experience supplying medical simulators to 1,500+ institutions across 28 states. We provide pan-India delivery, on-site installation, faculty orientation, and dedicated after-sales support. All products carry genuine manufacturer warranty and meet ISO 9001 quality standards.

Frequently Asked Questions

Q: What patient age does this trainer simulate? A: This head simulates a 3-year-old child — the only 3-year-old configuration in the Life/form® child airway management range. For 1-year-old training, see the Infant Airway Trainer with Stand (LF03623U). For 5-year-old training, see the Child Airway Management Trainer with Stand (LF03609) or the Advanced Child Airway Management Trainer (LF03762).

Q: What is the maximum ET tube size for this trainer? A: This trainer accepts 4.0 mm endotracheal tubes — the appropriate size for a 3-year-old patient simulation.

Q: What is the warranty and how do I get support? A: All Nasco Healthcare products carry standard manufacturer warranty. A downloadable user manual is available on the product page. For support, reach us at sem@semtrainers.com or call +91-88495 63724.

Supplied with carrying bag and lubricant.
