AirSim Child Combo X

Item No.	CC10006X
Weight	Approx. 2.6kg
Make:	TruCorp, Ireland

Read More

SKU:

Categories: Airway Management Child

Product Description

True-to-life training in pediatric airway management and cricothyroidotomy. This model is ideal for training in intubation, needle & surgical cricothyroidotomy, percutaneous tracheostomy and direct & video laryngoscopy. Includes the uniquely constructed AirSim® airway enhanced with palpable cricoid

landmarks, laryngeal cartilages and tracheal rings, backed by a 3-year warranty.

Model Features

- Innovative pediatric AirSim® airway & nasal cavity created from CT DICOM data
- Anatomically correct internal features and visually accurate landmarks in airway and nasal passage
- Wraparound replaceable neck skin rotates for 10-15 incisions
- Easy identification of sternal notch, tracheal rings & cricoid and laryngeal cartilages
- Inflatable tongue with lifelike texture can simulate edema
- Replaceable lung bags inflate with successful ventilation

Medical Procedure Training

- Needle and surgical cricothyroidotomy
- Percutaneous tracheostomy
- Double nasotracheal intubation
- Bag-valve mask (BVM) ventilation techniques
- Full range of supraglottic device insertion
- Direct and video laryngoscopy including Sellick Maneuver
- Awake fiberoptic examination
- Endotracheal tube insertion
- Combi tube insertion
- Naso gastric tube insertion techniques

Lifelike Manikin for Pediatric Intubation, Tracheostomy & Cricothyroidotomy Training

The AirSim Child Combo X features the uniquely constructed AirSim airway enhanced with tracheal rings, simulated cricoid and laryngeal cartilages. This combination creates an ideal solution for realistic training in airway management, percutaneous tracheostomy and emergency cricothyroidotomy. TruCorp's AirSim Child Combo X is the most advanced and realistic pediatric airway trainer on the market today, designed to withstand repeated use in a classroom setting. The AirSim Child Combo X airway manikin is compatible with a full range of supraglottic devices. We recommend the following equipment sizes for optimal performance:

- Bag Mask – Size 3
- OPA – 70mm
- NPA – Size 4

- I-Gel – Size 2
- Endotracheal Intubation – cuffed size 5-5.5
- Nasotracheal Intubation – cuffed size 4,0, uncuffed 4.5

Due to its versatility and durability, the AirSim Child Combo X is also an excellent airway demonstration model for device manufacturers and educators. Contact us for a free manikin demonstration or ask us about custom pricing for high-volume orders.

ADVANCED CHILD AIRWAY MANAGEMENT TRAINER

TruCorp intubation manikins are the most lifelike and durable airway management trainers on the market today. We're committed to providing effective training and improving patient outcomes with our innovative line of medical training manikins. Simulation?based education (SBE) is an effective educational method that can improve the proficiency and competence of medical professionals dealing with child (bmcnurs.biomedcentral.com) *"We are loyal to the AirSim manikins because they are the most realistic models on the market…The manikins are well suited to our training, the incredible realism and anatomically correct details provide our pediatric anesthesiology and critical care learners an experience similar to a real clinical scenario… The product range is ever expanding and TruCorp continues to produce airway trainers that reflect the real world challenges we face."* -Patrick Ross, Los Angeles Children's Hospital

PAEDIATRIC FRONT OF NECK ACCESS TRAINER

Front of neck access in a paediatric airway emergency requires regular training to build and maintain the necessary skills. Our AirSim Child Combo X model facilitates efficient, true-to-life practice in simulated paediatric emergency front of neck airway (FONA) techniques including paediatric cricothrotomy (needle and surgical) and percutaneous tracheostomy.

AIRWAY TRAINERS FOR MEDICAL PROCEDURE TRAINING

TruCorp has produced a range of intubation manikins to facilitate training in different medical procedures.

- Cricothyrotomy training manikins
- Tracheostomy training manikins
- Bronchoscopy training manikins
- Difficult airway trainers
- Pediatric airway trainers
- Bag-valve-mask ventilation

INNOVATIVE AND DURABLE AIRSIM AIRWAY COVERED BY 5-YEAR WARRANTY

The AirSim airway provides realistic feedback during airway management procedures and withstands continuous and repeated use. The AirSim Child Combo X is covered by a 3-year warranty and certified for 80,000+ intubation cycles. The AirSim nasal passage has been

developed in a manner similar to the AirSim airway and provides an anatomically correct nasal cavity with important landmarks such as the turbinates clearly defined. An inflatable tongue with lifelike size and texture simulates edema for training in obstructed airway management.

Package Contents

- 1 Carrier/storage case
- 1 Bottle of TruCorp lubrication
- 3 Child lung bags replicating 2 lungs & stomach
- 5 Larynx inserts (1 attached, 4 extra)
- 1 Wrap around neck skin (attached)
- 2 sets of adhesive pads (attachable to suction cups for increased stability if required)

Parts & accessories

- Replacement AirSim Child Combo X Airway
- Child Combo X Head Skin and Nasal Passage
- Base Plinth
- Suction cup (Set of 8)
- Super Saver Child Cric Training Pack (100 procedures)
