SKU:

Categories:Catheterization

Product Description

Practice male and female urinary catheterization on these newly designed anatomically correct models. Training is enhanced by a new material that has a realistic feel and flexibility. Both models utilize a 16 FR catheter and can be used to demonstrate balloon inflation procedures. A fluid reservoir allows for urine output upon successful completion of the insertion procedure. Instructors are able to teach sterile technique and insertion and removal of catheter, as well as practice preparing the patient for the procedure.

Why Choose the Male & Female Catheterization Trainers Model Set for Your Nursing Skills Lab in India?

The Male & Female Catheterization Trainers Model Set (Item No. 160-1933U, 2.95 kg, 33 × 33 × 30.5

cm, Make: Nasco Healthcare, USA) gives your lab both male and female urinary catheterization training in one purchase, using newly designed, anatomically correct models with realistic, flexible material.

Both models use a 16 FR catheter and support balloon inflation procedure practice. Each model includes a **built-in fluid reservoir**, producing urine output automatically on successful catheter insertion — giving students immediate, self-contained feedback without needing a separate fluid supply. Instructors can teach sterile technique, catheter insertion and removal, and patient preparation on either model.

This set is a practical option for labs that want dedicated, anatomy-specific catheterization trainers for both sexes without purchasing and managing two separate standalone units.

Why Buy from SEM Trainers? SEM Trainers & Systems is an authorized distributor of Nasco Healthcare products in India with over 30 years of experience supplying medical simulators and clinical skills training equipment to 1,500+ institutions across 28 states. We provide pan-India delivery and dedicated after-sales support.

Q: Does this include a separate fluid supply? A: No — each model has a built-in fluid reservoir, producing urine output automatically on successful catheterization.

Q: What catheter size is used? A: A 16 FR catheter on both models.

Q: How do I order from SEM Trainers? A: Contact us at sem@semtrainers.com or call +91-88495 63724 for pricing and availability.
