SKU:

Categories: Catheterization

Product Description

Practice male urinary catheterization on this newly designed anatomically correct model. Training is enhanced by a new material that has a realistic feel and flexibility. The model utilizes a 16 FR catheter and can be used to demonstrate balloon inflation procedures. A fluid reservoir allows for urine output upon successful completion of the insertion procedure. Instructors are able to teach sterile technique and insertion and removal of catheter, as well as practice preparing the patient for the procedure.

Why Choose the Male Catheterization Trainer for Your Nursing Skills Lab in India?

The Male Catheterization Trainer (Item No. 160-1931U, 1.36 kg, 35.6 × 22.9 × 12.7 cm, Make: Nasco Healthcare, USA) is a newly designed, anatomically correct model for practicing male urinary catheterization, built from a new material with realistic feel and flexibility. It uses a 16 FR catheter and

supports balloon inflation procedure practice.

Like its female counterpart, this model includes a **built-in fluid reservoir** — urine output flows automatically on successful catheter insertion, giving students immediate, self-contained feedback without needing a separate fluid supply setup. Instructors can teach sterile technique, catheter insertion and removal, and patient preparation on this unit.

This trainer pairs naturally with the Female Catheterization Trainer (160-1932U) for labs building complete male and female catheterization coverage, or is available together as the Male & Female Catheterization Trainers Model Set (160-1933U).

Why Buy from SEM Trainers? SEM Trainers & Systems is an authorized distributor of Nasco Healthcare products in India with over 30 years of experience supplying medical simulators and clinical skills training equipment to 1,500+ institutions across 28 states. We provide pan-India delivery and dedicated after-sales support.

Q: Does this need a separate fluid supply? A: No — it has a built-in fluid reservoir, producing urine output automatically on successful catheterization.

Q: What catheter size does it use? A: A 16 FR catheter.

Q: Is there a combined male/female option? A: Yes — the Male & Female Catheterization Trainers Model Set (160-1933U) includes both units together.

Q: How do I order from SEM Trainers? A: Contact us at sem@semtrainers.com or call +91-88495 63724 for pricing and availability.
