Female Catheterization Trainer

Item No. 160-1932U
Weight 1.13kg
Dimensions 35.6 x 22.9 x 12.7 cm
Make: Nasco Healthcare, USA

[Read More](#)

SKU:

Categories: Catheterization

Product Description

Practice female urinary catheterization on this newly designed anatomically correct model. Training is enhanced by a new material that has a realistic feel and flexibility. The model utilizes a 16 FR catheter and can be used to demonstrate balloon inflation procedures. A fluid reservoir allows for urine output upon successful completion of the insertion procedure. Instructors are able to teach sterile technique and insertion and removal of catheter, as well as practice preparing the patient for the procedure.

Why Choose the Female Catheterization Trainer for Your Nursing Skills Lab in India?

The Female Catheterization Trainer (Item No. 160-1932U, 1.13 kg, 35.6 × 22.9 × 12.7 cm, Make: Nasco Healthcare, USA) is a newly designed, anatomically correct model for practicing female urinary catheterization. A new material gives the model realistic feel and flexibility, and it uses a 16 FR

catheter, supporting practice of balloon inflation procedures as part of the full catheterization sequence.

Unlike some catheterization trainers that require a separately-sourced fluid supply, this model includes a **built-in fluid reservoir** — urine output flows automatically upon successful catheter insertion, giving students immediate, self-contained feedback without additional setup. Instructors can use it to teach sterile technique, catheter insertion and removal, and patient preparation for the procedure.

Why Buy from SEM Trainers? SEM Trainers & Systems is an authorized distributor of Nasco Healthcare products in India with over 30 years of experience supplying medical simulators and clinical skills training equipment to 1,500+ institutions across 28 states. We provide pan-India delivery and dedicated after-sales support.

Q: Does this need a separate fluid supply? A: No — it has a built-in fluid reservoir, producing urine output automatically on successful catheterization.

Q: What catheter size does it use? A: A 16 FR (French) catheter.

Q: How do I order from SEM Trainers? A: Contact us at sem@semtrainers.com or call +91-88495 63724 for pricing and availability.
