SKU:

Categories: Catheterization

Product Description

Special needs infants require specific, yet gentle, care which includes the performance of vital medical procedures. This newborn-size infant allows health care facilities and medical staff to teach special procedures and develop a nursing care plan for special needs infants. The simulator was developed for a wide range of educational training, including beginning nursing students. Medical devices that can be used include:

- tracheostomy tube and suction catheter
- gastrostomy tube
- nasogastric tube
- urethral catheter

Procedures that can be practiced include: • Tracheostomy care (lavage and suctioning) • Gastrostomy

cares (lavage and gavage) • Nasogastric care (placement, lavage, gavage, and suctioning) • Urethra catheterization (insertion, placement, and care) • Colostomy stoma (basic care purposes only)

The dimensions field literally reads "0 x 0 x 0 cm" and there's no weight at all — an obvious placeholder that slipped through, not an actual measurement. Content itself is clean and clinically coherent.

[Cert] Item No. LF01194U, Make Nasco Healthcare, USA. Dimensions field shows "0 x 0 x 0 cm" — this is a data-entry placeholder, not a real measurement (a physical infant manikin can't have zero dimensions), and weight is missing entirely.

[Cert] This is a newborn-size manikin purpose-built for special needs infant care — a genuinely distinct clinical training need from general pediatric or newborn simulators, covering the compound care scenario of a medically complex infant requiring multiple concurrent devices (tracheostomy tube, gastrostomy tube, nasogastric tube, urethral catheter) rather than single-procedure practice.

Trainable procedures: Tracheostomy care (lavage and suctioning), gastrostomy care (lavage and gavage), nasogastric care (placement, lavage, gavage, suctioning), urethral catheterization (insertion, placement, care), and basic colostomy stoma care.

DESCRIPTION (copy-paste into WordPress):

Why Choose the Special Needs Infant Male for Your NICU/Special Needs Pediatric Training in India?

The Special Needs Infant Male (Item No. LF01194U, Make: Nasco Healthcare, USA) is a newborn-size manikin built specifically to teach the care of medically complex infants — those requiring multiple concurrent medical devices and specialized nursing attention. It supports the development of a full nursing care plan for a special needs infant, not just isolated skill practice, making it suitable for a wide range of training levels including beginning nursing students.

Medical devices simulated: Tracheostomy tube and suction catheter, gastrostomy tube, nasogastric tube, urethral catheter.

Procedures trainable:

- Tracheostomy care (lavage and suctioning)
- Gastrostomy care (lavage and gavage)
- Nasogastric care (placement, lavage, gavage, and suctioning)
- Urethral catheterization (insertion, placement, and care)
- Colostomy stoma care (basic care purposes only)

Why Buy from SEM Trainers? SEM Trainers & Systems is an authorized distributor of Nasco Healthcare products in India with over 30 years of experience supplying medical simulators and pediatric clinical skills training equipment to 1,500+ institutions across 28 states. We provide pan-India delivery and dedicated after-sales support.

Q: What makes this different from a standard newborn simulator? A: It's built specifically to teach concurrent management of multiple medical devices a special needs infant may require — tracheostomy, gastrostomy, NG tube, and urinary catheter — as part of a complete nursing care plan.

Q: How do I order from SEM Trainers? A: Contact us at sem@semtrainers.com or call +91-88495 63724 for pricing and availability.
