Why Choose the Female Cath-Ed II Simulator for Your Nursing Skills Lab in India?

The Female Cath-Ed II Simulator (Item No. LF01026U, 38 × 36 × 20 cm, Make: Nasco Healthcare, USA) provides focused practice in female urinary catheterization, sharing most of the same features as the companion Male Cath-Ed I Simulator. The key difference: the vulva is molded intact, specifically to help students practice identifying the urethral opening and correctly spreading the labia — the

anatomical skill that differentiates female catheterization technique from male.

This makes it a natural companion purchase alongside the Male Cath-Ed I Simulator for labs that want dedicated, anatomy-specific catheterization trainers for both sexes rather than a single combined unit.

What's included: Hard carrying case, lubricant, catheters, 50cc bulb, syringe, instruction manual.
