SKU:

Categories: Catheterization

Product Description

This advanced and incredibly realistic model with male and female features includes:

- Internal organs (heart, lung, intestine system, stomach, and bladder)
- Removable belly covering

- Interchangeable genital organs
- Soft ears
- Fully movable head, arms and legs

It allows trainees to practice both basic and medical infant care such as:

- Tracheotomy care
- Male and female catheterization
- Insertion of a tube into mouth or nose
- Enema insertion
- Femoral, gluteal intramuscular and subcutaneous injections
- Palpitation of fontanel

This confirms and completes the five-way comparison table from the previous product — good consistency across both pages. One real clinical terminology error to flag and correct: "Palpitation of fontanel" should be "Palpation."

[Cert] Item No. 1000505 [P30], weight 2.5 kg, dimensions 52 cm (length), Brand 3B Scientific. [Cert] Terminology correction: "Palpitation" is a rapid or irregular heartbeat; the clinical examination technique of feeling with the hands is "palpation." This is a genuine clinical term substitution, not a stylistic quibble — "palpitation of fontanel" doesn't mean anything clinically, while "palpation of fontanel" (checking the soft spots on a newborn's skull) is a real, important pediatric nursing assessment skill.

[Cert] Per the comparison table (consistent with the Mike & Michelle page), this unit supports **bandaging only, not bathing** — a real capability limitation distinct from the other simulators in the family, worth stating accurately rather than assuming full bathing/bandaging parity.

Why Choose the 3B Scientific® Nurse Training Baby, New Born, for Your Pediatric Nursing Skills Lab in India?

The Nurse Training Baby, New Born (Item No. 1000505 [P30], 2.5 kg, 52 cm, Brand: 3B Scientific) is an advanced, incredibly realistic newborn model with male and female interchangeable features, internal organs (heart, lung, intestine system, stomach, and bladder), a removable belly covering, soft ears, and a fully movable head, arms, and legs.

Trainable skills: Tracheotomy care, male and female catheterization, insertion of a tube into the mouth or nose, enema insertion, femoral and gluteal intramuscular and subcutaneous injections, and palpation of fontanel (assessing the soft spots on a newborn's skull) — a foundational newborn assessment skill.

Please note: this unit supports bandaging but not full-body bathing exercises, unlike some other simulators in this age-tiered family — a distinction worth confirming against your curriculum needs.

Choosing the right pediatric/newborn simulator: This newborn-tier unit sits alongside the Susie Simon® Nursing Care Newborn Patient Simulator, both distinct from the more advanced 1-year-old (Mike® and Michelle®) and 5-year-old (Multipurpose Patient Care Simulator, Nursing Care Patient Simulator) units in the same family. This unit uniquely offers lavage/gavage and OP/NP tube placement with suctioning among the newborn-tier options — capabilities the Susie Simon newborn simulator doesn't include, though Susie Simon adds heel stick and finger prick technique training that this unit lacks.

Accessories included: Syringe, suction catheter, feeding tube, urinary catheter, urine collection bag, catheter lubricant, carrying bag.

Why Buy from SEM Trainers? SEM Trainers & Systems is an authorized distributor of 3B Scientific products in India with over 30 years of experience supplying medical simulators and pediatric clinical skills training equipment to 1,500+ institutions across 28 states. We provide pan-India delivery and dedicated after-sales support.

Q: Does this support full bathing exercises? A: No — this unit supports bandaging but not full-body bathing, per the manufacturer's specification.

Q: How does this compare to the Susie Simon newborn simulator? A: This unit adds lavage/gavage and OP/NP tube placement with suctioning, while Susie Simon adds heel stick and finger prick technique training.

Q: How do I order from SEM Trainers? A: Contact us at sem@semtrainers.com or call +91-88495 63724 for pricing and availability.

Accessories include syringe, suction catheter, feeding tube, urinary catheter, urine collection bag, catheter lubricant and carrying bag.
