Categories: Ear, Nose and Throat Examination

Product Description

Hardware and software upgrade which mounts on your existing OphthoSim™ and allows you to enjoy the benefits of OtoSim 2™.

Why Choose the Ear Upgrade Kit for OphthoSim™ for Your Simulation Lab in India?

The Ear Upgrade Kit for OphthoSim™ (Item No. 1021955, MPN: 13-101) is a 1 kg hardware and software upgrade kit that mounts onto an existing OphthoSim™ ophthalmoscopy simulator and converts it into an OtoSim 2™ otoscopy simulator — giving simulation labs that already own an OphthoSim™ the benefits of the OtoSim 2™ platform without purchasing a separate standalone OtoSim 2™ unit. For medical colleges, nursing institutes, and clinical skills labs in India that own an OphthoSim™ and want to expand into otoscopy simulation training, this kit is the most cost-effective

upgrade path available.

The OtoSim 2™ platform — which this kit converts the OphthoSim™ into — is a digital otoscopy training system that displays tympanic membrane pathologies through a simulated otoscope interface, allowing trainees to practise otoscope insertion technique and ear pathology recognition on a simulator before working with real patients. Converting an existing OphthoSim™ with this kit means one device can serve both ophthalmoscopy training (when configured as OphthoSim™) and otoscopy training (when the ear upgrade kit is attached), maximising the utilisation of a single simulation investment. For simulation labs with limited budget for separate dedicated simulators for each clinical examination modality, this dual-platform approach reduces per-modality capital cost while delivering full training capability for both eye and ear examination.

Why Buy from SEM Trainers? SEM Trainers & Systems has over 30 years of experience supplying medical simulators and genuine OEM accessories to 1,500+ institutions across 28 states in India. We provide pan-India delivery and dedicated after-sales support. All products carry genuine manufacturer warranty.

Frequently Asked Questions

Q: What does this kit do? A: It mounts onto an existing OphthoSim™ and converts it into an OtoSim 2™ otoscopy simulator, adding ear examination training capability to a device already used for ophthalmoscopy training.

Q: Do I need to own an OphthoSim™ first? A: Yes. This is an upgrade kit for an existing OphthoSim™, not a standalone product. Confirm your OphthoSim™ model compatibility with SEM Trainers before ordering.

Q: How do I order and get support from SEM Trainers? A: Contact us at sem@semtrainers.com or call +91-88495 63724 to confirm compatibility before ordering.
