Categories: Ear, Nose and Throat Examination

Product Description

Software upgrade with set of 3 applications (image creator, image annotator and slide presenter) that allows healthcare educators to customize their simulation training sessions.

Why Choose the Educators Image Toolkit™ for OphthoSim™ for Your Simulation Lab in India?

The Educators Image Toolkit™ for OphthoSim™ (Item No. 1021956, MPN: 63-101) is a 0.1 kg software upgrade for the OphthoSim™ ophthalmoscopy simulator — a three-application suite that enables healthcare educators to build, annotate, and present custom diagnostic image sets through the OphthoSim™ platform rather than relying solely on the pre-loaded image library. For medical colleges, ophthalmology training programmes, and clinical skills labs in India that want to align their OphthoSim™ training sessions with their own institution-specific curriculum, patient case library, or examination question bank, this toolkit provides the authoring capability to do so without vendor dependency on

OEM-supplied image sets.

The three applications address different stages of the educator's workflow. The **image creator** allows educators to upload and configure their own fundus images — such as locally collected clinical photographs or licensed retinal image databases — into the OphthoSim™ display format. The **image annotator** enables structured labelling and teaching notes to be added directly to diagnostic images, creating annotated teaching cases that trainees examine through the simulator and then review with instructor commentary. The **slide presenter** organises the configured image sets into presentation sequences suitable for structured group teaching or assessment sessions, enabling the instructor to advance through a pre-planned diagnostic curriculum from a single interface. Together the three tools convert the OphthoSim™ from a fixed-content simulator into a fully customisable clinical education platform.

Why Buy from SEM Trainers? SEM Trainers & Systems has over 30 years of experience supplying medical simulators and genuine OEM accessories to 1,500+ institutions across 28 states in India. We provide pan-India delivery and dedicated after-sales support.

Frequently Asked Questions

Q: What are the three applications in this toolkit? A: Image creator (upload and configure custom diagnostic images), image annotator (add structured labels and teaching notes to images), and slide presenter (organise images into structured teaching sequences for group sessions).

Q: Do I need an OphthoSim™ to use this toolkit? A: Yes. This is a software upgrade for the OphthoSim™ ophthalmoscopy simulator — it does not function as a standalone product.

Q: How do I order and get support from SEM Trainers? A: Contact us at sem@semtrainers.com or call +91-88495 63724 to confirm OphthoSim™ compatibility before ordering.
