Categories: Ear, Nose and Throat Examination

Product Description

Hardware and software upgrade which mounts on your existing OtoSim 2™ and allows you to enjoy the benefits of OphthoSim™.

Why Choose the Eye Upgrade Kit for OtoSim 2™ for Your Simulation Lab in India?

The Eye Upgrade Kit for OtoSim 2™ (Item No. 1021951, MPN: 11-102) is a 1 kg hardware and software upgrade kit that mounts onto an existing OtoSim 2™ otoscopy simulator and converts it into an OphthoSim™ ophthalmoscopy simulator — giving simulation labs that already own an OtoSim 2™ the benefits of the OphthoSim™ platform without purchasing a separate standalone OphthoSim™ unit. For medical colleges, nursing institutes, and clinical skills labs in India that own an OtoSim 2™ and want to expand into ophthalmoscopy and fundoscopy training, this kit is the most cost-effective

upgrade path available.

The OphthoSim™ platform — which this kit converts the OtoSim 2™ into — is a digital ophthalmoscopy training system that displays retinal and fundus pathologies through a simulated ophthalmoscope interface, allowing trainees to practise ophthalmoscope technique and fundus pathology recognition on a simulator before working with real patients. Converting an existing OtoSim 2™ with this kit means one device can serve both otoscopy training (when configured as OtoSim 2™) and ophthalmoscopy training (when the eye upgrade kit is attached), maximising the utilisation of a single simulation investment. For simulation labs with limited budget for separate dedicated simulators for each clinical examination modality, this dual-platform approach reduces per-modality capital cost while delivering full training capability for both ear and eye examination.

The companion Ear Upgrade Kit for OphthoSim™ (1021955) works in the reverse direction — converting an existing OphthoSim™ into an OtoSim 2™ — for labs that already own an OphthoSim™ and want to add otoscopy training.

Why Buy from SEM Trainers? SEM Trainers & Systems has over 30 years of experience supplying medical simulators and genuine OEM accessories to 1,500+ institutions across 28 states in India. We provide pan-India delivery and dedicated after-sales support.

Frequently Asked Questions

Q: What does this kit do? A: It mounts onto an existing OtoSim 2™ and converts it into an OphthoSim™ ophthalmoscopy simulator, adding fundus and retinal pathology training capability to a device already used for otoscopy training.

Q: Do I need to own an OtoSim 2™ first? A: Yes. This is an upgrade kit for an existing OtoSim 2™, not a standalone product. Confirm your OtoSim 2™ model compatibility with SEM Trainers before ordering.

Q: Is there a kit that works the other way — converting OphthoSim™ into OtoSim 2™? A: Yes — the Ear Upgrade Kit for OphthoSim™ (Item No. 1021955) converts an existing OphthoSim™ into an OtoSim 2™ otoscopy simulator.
