SKU:

Categories:Epidural and Lumbar

Product Description

Why Choose the Pediatric Lumbar Puncture Replacement Kit for Your Simulation Lab in India?

The Pediatric Lumbar Puncture Replacement Kit (Item No. LF01000(A)) by Nasco Healthcare, USA is a 0.23 kg genuine OEM replacement consumable kit for the Life/form® Pediatric Lumbar Puncture Simulator (LF01000U) — replacing the lumbar puncture pad with embedded spine and spinal tubing that is the wear component of the simulator. The lumbar pad is the element of the simulator that absorbs repeated needle punctures during LP training practice; over high training volumes it loses the realistic resistance and tactile "give" feedback that make paediatric LP training clinically meaningful, and must be replaced to restore the training quality the simulator was designed to deliver.

For paediatric medicine residency programmes, neonatal nursing simulation labs, and NMC-mandated clinical skills labs in India running regular lumbar puncture training on the LF01000U simulator, maintaining a stock of genuine OEM LF01000(A) replacement kits ensures training is never interrupted by a depleted pad. Only genuine OEM replacement pads are guaranteed to replicate the original lumbar pad's resistance characteristics — including the correct tactile "give" as the spinal needle traverses the ligamentum flavum and enters the subarachnoid space, and the correct CSF flow upon successful placement. Third-party pads may not replicate the original material compliance or puncture resistance of the OEM component, degrading the tactile feedback that validates correct needle technique during training.

Why Buy from SEM Trainers? SEM Trainers & Systems is an authorized distributor of Nasco Healthcare products in India with over 30 years of experience supplying medical simulators and genuine OEM consumables to 1,500+ institutions across 28 states. We provide pan-India delivery and dedicated after-sales support. All products carry genuine manufacturer warranty.

Frequently Asked Questions

Q: Which simulator is this replacement kit compatible with? A: This kit (LF01000(A)) is the OEM replacement consumable for the Life/form® Pediatric Lumbar Puncture Simulator (LF01000U) by Nasco Healthcare.

Q: What does this kit replace? A: The lumbar puncture pad with embedded spine and spinal tubing — the needle-puncture wear component of the LF01000U simulator.

Q: How do I order from SEM Trainers? A: Contact us at sem@semtrainers.com or call +91-88495 63724. We supply genuine Nasco Healthcare OEM consumables with pan-India delivery.
