Product Description

This pad that looks and feels like human skin is ideal for diabetic instruction and injection practice. May be worn on the body in specific locations (stomach, thigh, upper arm) to allow patients to inject fluid into the pad to practice giving themselves injections. Pad is thick enough to accept all insulin needles. For safety purposes, the 6-1/4" L x 4-1/4" W x 3/4" D oval pad has a hard plastic backing to prevent the needle from poking through the pad and into the wearer’s skin. Has a 1" wide nylon strap with an adjustable plastic buckle. Why Choose the Diabetic Injection Pad for Your Simulation Lab in India? The Diabetic Injection Pad from 3B Scientific is a trusted training tool used across simulation labs in India for hands-on diabetic injection training practice. This simulator helps medical students and healthcare professionals build critical competencies in a safe, controlled environment — fully aligned with NMC's Competency-Based Medical Education (CBME) guidelines for mandatory clinical skills training. Who Is This Simulator Ideal For? This product is recommended for medical colleges setting up OSCE stations, nursing institutions, and hospitals building clinical skills laboratories as per NMC guidelines. Whether

you are setting up a new simulation lab or upgrading your existing facility, the Diabetic Injection Pad offers an excellent balance of realism, durability, and training value.
