Spare Skin for Epidural and Spinal Injection Trainer

Item No. 1017892 [XP61-001]

Weight 0.45kg

Brand 3B Scientific

[Read More](#)**SKU:****Categories:**Epidural and Spinal

Product Description

Long-lasting and easy to clean replacement skin for the Epidural and Spinal Injection Trainer (P61/1017891). The Spare Skin for Epidural and Spinal Injection Trainer (Item No. 1017892 [XP61-001]) is a genuine replacement skin manufactured by 3B Scientific, weighing 0.45 kg. Designed specifically for use with the Epidural and Spinal Injection Trainer (P61/1017891), this long-lasting and easy-to-clean spare skin restores the realistic tactile feel of the lumbar skin surface after repeated needle insertions during epidural and spinal injection training. Replacing the skin with a genuine 3B Scientific component ensures continued accurate resistance and realistic surface texture — maintaining the quality and effectiveness of spinal and epidural anaesthesia training sessions for

medical students, anaesthesiologists, and nursing professionals.

Q1. What is the Spare Skin for Epidural and Spinal Injection Trainer used for? It is a replacement skin for the 3B Scientific Epidural and Spinal Injection Trainer (P61/1017891), restoring the realistic surface texture and needle resistance needed for accurate spinal and epidural anaesthesia training after repeated use.

Q2. Which trainer is this spare skin compatible with? This spare skin is specifically designed for use with the 3B Scientific Epidural and Spinal Injection Trainer (Item No. P61/1017891). Please verify compatibility before ordering.

Q3. How long-lasting is this replacement skin? The spare skin is manufactured by 3B Scientific to be long-lasting and durable, designed to withstand repeated needle insertions during training while maintaining realistic tactile feedback.

Q4. Is this skin easy to clean? Yes, the spare skin is designed to be easy to clean, making it practical for training environments where hygiene and maintenance are important considerations.

Q5. When should the spare skin be replaced? The skin should be replaced when it shows visible wear, needle puncture damage, or reduced tactile resistance — all of which can diminish the realism and effectiveness of epidural and spinal injection training.

Q6. Why is it important to use a genuine 3B Scientific replacement skin? Using a genuine 3B Scientific replacement ensures a proper fit and the correct level of needle resistance, maintaining the accuracy and realism of spinal and epidural training without risk of damage from incompatible materials.

Q7. What is the weight of this product? The spare skin weighs 0.45 kg, making it lightweight and easy to store alongside the Epidural and Spinal Injection Trainer.

Q8. Who is this product ideal for? It is ideal for medical colleges, anaesthesia departments, nursing institutes, pain management training centers, and simulation labs that regularly use the 3B Scientific Epidural and Spinal Injection Trainer for spinal and epidural anaesthesia skills training.

Q9. Where can I purchase this in India? You can enquire and order through SEM Trainers at **+91-88495 63724** or **+91-98791 03905**, or visit semtrainers.com.
