## Complete Intramuscular Injection Training Kit

Item No. 8000883 [3011909]

Brand 3B Scientific

[Read More](#)

**SKU:**

**Categories:** Intramuscular (I.m.) and Intradermal

### Product Description

**The Complete Intramuscular Injection Training Kit to practice IM injections anywhere on the body!**

This kit has the entire 3B Scientific suite of intramuscular injection simulators. Train how to locate the correct site for IM injections using realistic and anatomically accurate upper arm, buttock, and upper leg

simulators. Feel and visualize the correct needle depth for IM injections to prevent bone contact in real patients. Great for any IM Injection training course! **Includes:**

- P54 IM Injection Simulator
- P55/1 Upper Arm IM Injection
- P56 Upper Leg IM Injection
- P57 Buttock IM Injection

### Why Choose the Complete Intramuscular Injection Training Kit for Your Simulation Lab in India?

The Complete Intramuscular Injection Training Kit (Item No. 8000883 [3011909]) by 3B Scientific is the full suite of 3B Scientific intramuscular injection simulators bundled into a single kit — covering every major IM injection site used in clinical practice. For nursing colleges, allied health institutes, hospital in-service education teams, and NMC-mandated clinical skills labs across India that need to equip a complete IM injection training station without sourcing individual simulators separately, this kit provides the entire 3B Scientific IM simulator range in one procurement.

Intramuscular injection is one of the most commonly performed clinical procedures, and trainees must develop correct site selection and technique across all four anatomical sites — the deltoid of the upper arm, the gluteal region of the buttock, the vastus lateralis of the upper leg, and a general IM injection reference model — before performing the procedure on real patients. The kit includes the P54 IM Injection Simulator for general IM injection technique training; the P55/1 Upper Arm IM Injection Simulator for deltoid site training; the P56 Upper Leg IM Injection Simulator for vastus lateralis site training; and the P57 Buttock IM Injection Simulator for gluteal site training. Each simulator in the kit is anatomically accurate and realistically proportioned for its site, allowing trainees to practise landmark identification, correct needle angle, and appropriate depth at each location. Trainees can feel and visualise the correct needle depth required to reach muscle tissue, developing the tactile awareness needed to prevent bone contact or subcutaneous misdirection in real patients.

Procuring the Complete Kit rather than individual simulators ensures uniform equipment across all four training stations from a single order, simplifies inventory management, and guarantees that all simulators are from the same manufacturer and generation — important for consistent training outcomes across a cohort.

**Why Buy from SEM Trainers?** SEM Trainers & Systems is an authorized distributor of 3B Scientific products in India with over 30 years of experience supplying medical simulators to 1,500+ institutions across 28 states. We provide pan-India delivery, on-site installation, faculty orientation, and dedicated after-sales support.

**Q: What is included in the Complete Intramuscular Injection Training Kit?** A: The kit includes four

simulators: the P54 IM Injection Simulator, the P55/1 Upper Arm IM Injection Simulator, the P56 Upper Leg IM Injection Simulator, and the P57 Buttock IM Injection Simulator — covering all major IM injection sites.

**Q: Can each simulator in the kit be purchased individually?** A: Yes. Each of the four simulators is also available individually from SEM Trainers. The Complete Kit bundles all four in a single procurement for labs equipping a full IM injection training station.

**Q: Which injection sites does this kit cover?** A: The kit covers the deltoid (upper arm), gluteal (buttock), vastus lateralis (upper leg), and a general IM injection reference model — all four primary anatomical sites used for intramuscular injection in clinical practice.

**Q: Are needles and syringes included?** A: Please contact SEM Trainers to confirm which consumables are included or recommended for use with this kit.
