Skin, Musculature and Spinal Cord

Item No. LF01039U

Weight 0.35kg

Make: Nasco Healthcare, USA

[Read More](#)

SKU:

Categories: Epidural and Spinal

Product Description

With skin, musculatuers and spinal cored. For use with the [Spinal Injection Simulator, item W44031](#).

The Skin, Musculature and Spinal Cord (Item No. LF01039U) is a genuine replacement component manufactured by Nasco Healthcare, USA, weighing just 0.35 kg. Designed specifically for use with the Spinal Injection Simulator (Item No. W44031), this replacement part includes realistic skin, musculature layers, and spinal cord structures that replicate the anatomical feel of the lumbar region — ensuring continued accurate and realistic spinal injection and lumbar puncture training. It is an essential consumable for medical colleges, anaesthesia departments, nursing institutes, and clinical skills labs that regularly practice spinal and epidural injection techniques on the compatible simulator.

Q1. What is the Skin, Musculature and Spinal Cord replacement used for? It is a replacement

component for the Spinal Injection Simulator (W44031), restoring realistic skin, musculature, and spinal cord layers to maintain accurate lumbar puncture and spinal injection training after repeated use.

Q2. Which simulator is this component compatible with? This replacement part is specifically designed for use with the Life/form® Spinal Injection Simulator (Item No. W44031). Please verify compatibility before ordering.

Q3. Why does this component need replacing? After repeated spinal injection and lumbar puncture practice sessions, the skin and musculature layers can show signs of wear and needle damage, reducing the realism of the tactile feedback. Replacing this component restores the simulator to its original training quality.

Q4. What layers are included in this replacement component? The component includes realistic skin, musculature layers, and spinal cord structures that replicate the anatomical layers encountered during lumbar puncture and spinal injection procedures.

Q5. Why is it important to use a genuine replacement component? Using a genuine Nasco Healthcare replacement ensures a proper anatomical fit and realistic needle resistance, maintaining the accuracy and effectiveness of spinal injection training without the risk of damage from incompatible parts.

Q6. What is the weight of this component? It weighs just 0.35 kg, making it compact and easy to store alongside the Spinal Injection Simulator.

Q7. Who manufactures this product? It is manufactured by Nasco Healthcare, USA — a globally trusted brand in medical simulation and clinical skills training equipment.

Q8. Who is this product ideal for? It is ideal for medical colleges, anaesthesia departments, nursing institutes, pain management training centers, and clinical skills labs that use the Spinal Injection Simulator (W44031) for lumbar puncture and spinal injection training.

Q9. Where can I purchase this in India? You can enquire and order through SEM Trainers at **+91-88495 63724** or **+91-98791 03905**, or visit semtrainers.com.
