Product Description

LAP-X VR is an innovative virtual reality simulator for cost-effective motor skills training for different surgical specialties. It provides a validated package of various curricula of increasing difficulty to attain proficiency skill levels in all surgical specialties, including gynecology, urology, pediatric surgery, general surgery and gastrointestinal surgery.

LAP-X VR offers an excellent training aid to standardize, structure, and complement hands-on skills training in surgical residency programs. With the possibility of metrics measurement and performance recording as well as online remote assessment, LAP-X VR provides an ideal training solution to help surgical educators save time, effort and money while achieving the best training results.

Simulator benefits:

- Affordable and easy to set up Virtual Reality system
- Instant feedback with measurements
- Possibility to use real instruments
- Ability to add and modify existing modules and exercises
- Administration tool to monitor the training progress of trainees

System specifications:
2 controllers (22 x 15 x 32 cm, 1.6 kg each)
2 grasper instruments
1 three-key foot pedals
