Product Description

Circumcision is a surgical procedure performed to remove the loose tissue, known as the foreskin, covering the glans of the penis. This worldwide procedure is performed for health, religious, or cultural reasons shortly after birth, around puberty, or during young adulthood. The World Health Organization (WHO), the Joint United Nations Program on HIV and AIDS (UNAIDS), and the Center for Disease Control (CDC) state evidence that indicates male circumcision significantly reduces the risk of female-to-male HIV transmission by over 50%. The Circumcision Trainers have been developed with the assistance from one of the top medical schools in Wisconsin, USA, as well as medical professionals in South Africa and Indonesia. The trainers include the foreskin, glans penis, frenulum, meatus, and coronal groove. These trainers are made with soft, lifelike material, which is pliable, delicate, and realistic to the touch. Medical students, physicians, and other practitioners can learn, practice, and improve realistic, hands-on skills for this delicate procedure without the worry of learning on a live patient. Practice simulating dorsal block injection, separating the inner lining of the foreskin (preputial

epithelium) from its attachment to the glans, surgical removal of the foreskin, and suturing techniques. These trainers may also be used to demonstrate the procedure and practice aftercare skills to family members. Since there are different methods of circumcision, the Circumcision Trainers have been designed for Mogen clamp method, Guillotine clamp method, Gomco clamp method, Plastibell method, dorsal slit method, forceps guided method, and sleeve circumcision. The Pre-Teen Circumcision Training Kit is a complete kit for all circumcision training needs. Includes one base, six glans penis cores, six foreskins, instruments (scalpel, 4-1/2" micro-forceps, 6" precision probe, Iris research scissors, 5" straight Halstead mosquito forceps, 5" curved Halstead mosquito forceps, Ethicon suture thread with needle), instrument case, instructions, and soft nylon carrying case. Why Choose the Pre-Teen Circumcision Training Kit 3 for Your Simulation Lab in India? The Pre-Teen Circumcision Training Kit 3 from Nasco Healthcare is a trusted training tool used across simulation labs in India for hands-on circumcision training practice. This simulator helps medical students and healthcare professionals build critical competencies in a safe, controlled environment — fully aligned with NMC's Competency-Based Medical Education (CBME) guidelines for mandatory clinical skills training. Who Is This Simulator Ideal For? This product is recommended for medical colleges setting up OSCE stations, nursing institutions, and hospitals building clinical skills laboratories as per NMC guidelines. Whether you are setting up a new simulation lab or upgrading your existing facility, the Pre-Teen Circumcision Training Kit 3 offers an excellent balance of realism, durability, and training value. Why Buy from SEM Trainers? SEM Trainers is a leading supplier of medical manikins and simulators across India. Authorized Nasco Healthcare distributor in India. We provide complete support including pan-India delivery, on-site installation, faculty training workshops, and prompt after-sales maintenance. All our products carry genuine manufacturer warranty and meet ISO 9001 quality standards. Frequently Asked Questions Q: Is the Pre-Teen Circumcision Training Kit 3 compliant with NMC simulation lab requirements? A: Yes, this simulator supports the skill-based training competencies specified under NMC’s CBME framework for Indian medical and nursing institutions. Q: Does SEM Trainers provide installation and training support? A: Absolutely. We offer on-site installation, hands-on demo sessions, and faculty orientation workshops for every product delivered, anywhere in India. Q: What is the warranty and how do I get support? A: All products come with standard manufacturer warranty. For support, reach us at sem@semtrainers.com or call +91-88495 63724.
