Product Description

Component replacement part for KERi™/GERi™ Nursing Skills Manikin.

Stoma Bag for KERi™/GERi™ Nursing Skills Manikin (LF04099U) — Genuine OEM Replacement Consumable

The Stoma Bag for KERi™/GERi™ (Item No. LF04099U) is a genuine Nasco Healthcare Life/form® replacement stoma bag — the ostomy pouch accessory used during colostomy, ileostomy, and suprapubic stoma care training on the KERi™ and GERi™ Nursing Skills Manikin range. It is the correct reorder item when the stoma bag on your KERi™ or GERi™ manikin requires replacement due to wear, soiling, or damage from repeated ostomy care training sessions.

During stoma care training, trainees practise attaching, sealing, draining, and removing the stoma bag over the manikin's stoma opening — the same steps performed in clinical practice for patients with a colostomy, ileostomy, or suprapubic diversion. Replacing the bag with a genuine Nasco Healthcare OEM part ensures correct fit over the stoma aperture and consistent training fidelity across sessions.

Compatible with: KERi™ and GERi™ Nursing Skills Manikins — all tiers (Basic, Complete, Advanced) that include stoma training capability. Confirm compatibility with your specific manikin model before ordering.

Why Buy from SEM Trainers? SEM Trainers & Systems has over 30 years of experience supplying medical simulators and genuine spare parts to 1,500+ institutions across 28 states in India. We provide pan-India delivery and dedicated after-sales support.

Frequently Asked Questions

Q: What is the difference between the Stoma Bag (LF04099U) and the Stomach Bag Replacement? A: The Stoma Bag (LF04099U) is the external ostomy pouch that attaches over the manikin's stoma opening — used for colostomy, ileostomy, and suprapubic stoma care training. The Stomach Bag Replacement is the internal gastric reservoir used for NG tube feeding and gastric suction training. They are two separate parts for two different training functions. Confirm which part your manikin requires before ordering.

Q: Which manikins is this stoma bag compatible with? A: KERi™ and GERi™ Nursing Skills Manikins from Nasco Healthcare — all tiers that include stoma training capability. Confirm compatibility with your specific manikin model and item number before ordering.

Q: Is this a genuine OEM part? A: Yes. LF04099U is a genuine Nasco Healthcare Life/form® replacement consumable.

Q: How do I know when the stoma bag needs replacing? A: When the bag seal no longer fits correctly over the stoma opening, or when the bag material shows significant wear or soiling that cannot be cleaned adequately between training sessions.
