Advanced KERi™ Nursing Manikin (1017567 [W44403] / LF04022U)

KERi™ has a non-age-specific appearance, with complete lifelike range of motion, realistic patient positioning, and non-pinching joints that move like a person.

A true full-size, lightweight adult manikin. KERi™ measures 58" and weighs approximately 28 lbs, with an overall female appearance that easily converts to male with removal of the wig and attachment of male genitals.

Visual inspection findings built right in: normal and cancerous mole, a stage 1 sacral ulcer, dilated and constricted pupils, and reddened skin folds.

Simulates over 35 nursing and medical procedures, including bandaging and wound dressing, bed baths, clothing changes, denture placement and removal, ear canal irrigation with otic drops and hearing aid placement, eye irrigation, finger and toe manipulation with bandaging, hair care, intramuscular injection sites (arm, thigh, buttock), oral and nasal hygiene (lavage, gavage, suctioning), ostomy care with appliance maintenance, patient positioning and transfer techniques, pericare, tracheostomy care, gastrostomy procedures, enema administration (female), urinary catheterization (female and uncircumcised male), pap smears and douching, prostate exam (Stage B), nasogastric tube placement, and internal fluid reservoirs.

Advanced tier adds dedicated IV and blood pressure training arms. A right IV training arm features a shoulder intramuscular injection site with replaceable skin and veins that roll when palpated, plus realistic flashback to confirm proper needle placement. A left blood pressure training arm reproduces all five Korotkoff sounds, letting instructors vary systolic and diastolic levels, pulse rate, volume, and the auscultatory gap. Standard arms with right and left shoulder intramuscular injection sites are also included.

Part of a tiered KERi™/GERi™ family. This Advanced tier builds on Basic and Complete skin care, ostomy, and gastrostomy/catheterization skills by adding IV insertion and blood pressure monitoring, while the Auscultation tier focuses on heart and lung sound recognition.

Why Buy from SEM Trainers? SEM Trainers & Systems has over 30 years of experience supplying medical education resources to 1,500+ institutions across 28 states. We provide pan-India delivery and dedicated after-sales support.

Frequently Asked Questions

Q: What does the Advanced tier add over Complete? A: A dedicated right IV training arm with realistic flashback confirmation, and a left blood pressure training arm reproducing all five Korotkoff sounds.

Q: How many procedures does this manikin support? A: Over 35 nursing and medical procedures.
