Diabetic Foot Treatment Trainer

Item No. 1018815 [P14]

Weight 0.3kg

Brand 3B Scientific

[Read More](#)

SKU:

Categories: Decubitus Care

Product Description

The after-effects of a diabetes mellitus can result in defects and pressure points in the area of the foot. In this Decubitus Foot skill trainer, a gangrenous alteration on the big toe of the right foot has already spread from the back of the foot to the metatarsal. A mal perforans (trophic ulcer) is visible on the sole of the foot (plantar). A grade 3 pressure-ulcer is depicted in the heel area. A complete skin layer is lost and the subcutaneous tissue is damaged up to necrosis. This is recognisable by black colouration in the wound area. Leg not included.

Diabetic Foot Treatment Trainer (1018815 [P14])

The Diabetic Foot Treatment Trainer (Item No. 1018815 [P14], 0.3 kg) by 3B Scientific demonstrates the after-effects of diabetes mellitus on the foot, showing realistic defects and pressure points that

develop from diabetic complications.

Multiple realistic pathologies on one model. A gangrenous alteration on the big toe of the right foot spreads from the back of the foot to the metatarsal. A mal perforans (trophic ulcer) is visible on the sole of the foot (plantar). A grade 3 pressure ulcer is depicted in the heel area, with complete skin layer loss and subcutaneous tissue damage through to necrosis — recognizable by the black coloration in the wound area.

Please note: the leg is not included.
