SKU:

Categories:Enema Administration

Product Description

High quality life-size bowel care trainer for realistic **enema and bowel care management** interventions training. Improve the hospital patient care training in order to reduce the risk of complications associated with management of lower bowel dysfunction and ensure patient safety. The economical **Bowel Care Enema Trainer P16 by 3B Scientific®** is an excellent choice to optimize the skills of students and patient care staff with direct feedback, from the results of the enema administration. The various functions of the simulator allow the trainees to administer different procedures during the training. A secure fluid reception reservoir system makes the portable Bowel Care Trainer leakage free. Even sponge bath practice is possible using the simulated solid and soluble stool. Thanks to quick and easy change of the setting (< 1 min) various techniques can be trained under instructor control and during student practice. Train the following bowel care procedures:

- Enema Administration
 - Cleansing
 - Oil-Retention
 - Return-Flow
 - Medicated Enemas
- Suppositories administration
- Medication administration
- Digital Rectal Examination (DRE) and Stimulation (DRS)
- Digital Removal of Faeces (DRF)

Bowel Care & Enema Trainer P16 (1022519 [P16])

The Bowel Care & Enema Trainer P16 (Item No. 1022519 [P16], 3.8 kg, 55×35×32 cm) by 3B Scientific is a high-quality, life-size trainer for realistic enema and bowel care management training, designed to improve hospital patient care and reduce complications associated with lower bowel dysfunction.

Direct feedback drives real skill-building. This economical trainer helps students and patient care staff optimize their skills through direct feedback from the results of enema administration, with a secure fluid reception reservoir keeping the portable unit leakage-free.

Trains a comprehensive range of bowel care procedures:

- Enema administration (cleansing, oil-retention, return-flow, and medicated enemas)
- Suppository administration
- Medication administration
- Digital rectal examination (DRE) and stimulation (DRS)

- Digital removal of faeces (DRF)

Anatomically accurate and realistically positioned. Simulates the buttock of a patient with femoral stumps, anus, and bowel in a pre-positioned left lateral recumbent position, with a soft, flexible upper buttock the trainee must lift to gain access to the anus. Supports insertion of CH16 to CH40 catheters and balloon rectal tubes.

SKINlike™ silicone inserts for realistic tactile feedback. The different digital rectal inserts are made of SKINlike™ sturdy silicone to simulate human skin and tissue haptics during DRE and DRS, with the anus remaining closed and impenetrable after catheter removal thanks to the high-quality insert material.

Includes 3D anatomical teaching models of hemorrhoids. Two magnetically attached models — a rectum frontal section showing hemorrhoids, anal fissures, and fistulae, and an external view of swollen anal prolapse and hemorrhoid knots — can be easily passed between students during class.

Fast, flexible setup for classroom use. Settings can be changed in under a minute, allowing various techniques to be trained under instructor control or during independent student practice. Enema solutions can be administered safely up to 2 liters, draining into the reception reservoir or directly into a nearby sink or canister.

Comes complete with: the Bowel Care Trainer P16, a secure fluid reception reservoir, DRE/DRS/DRF inserts, two magnetic 3D hemorrhoid models, artificial solid stools (Bristol Stool Chart Type I), solid and soluble stool powder, a dosage spatula and cup, artificial concentrate blood with pipette injector, talcum powder, Vaseline, a plastic storage box, and a soft carrying bag.

Why Buy from SEM Trainers? SEM Trainers & Systems is an authorised distributor of 3B Scientific products in India with over 30 years of experience supplying medical education resources to 1,500+ institutions across 28 states. We provide pan-India delivery and dedicated after-sales support.

Frequently Asked Questions

Q: What bowel care procedures can be trained on this simulator? A: Enema administration (cleansing, oil-retention, return-flow, medicated), suppository administration, medication administration, digital rectal examination and stimulation, and digital removal of faeces.

Q: How much enema fluid can it handle? A: Up to 2 liters, drained via the secure fluid reception reservoir or directly into a sink or canister.

Q: What's included? A: The trainer, fluid reservoir, DRE/DRS/DRF inserts, two magnetic 3D hemorrhoid models, artificial stool materials, artificial blood, talcum powder, Vaseline, a storage box,

and a carrying bag.

Technical features of the Bowel Care Trainer P16:

- This high quality bowel care trainer simulates the buttock of a patient with femoral stumps, anus and bowel in pre-positioned left lateral recumbent position
- The upper buttock is soft and flexible to be most realistic; the trainee has to lift it to gain access to the anus
- Supports the insertion of CH16 to CH40 catheters and balloon rectal tubes
- The different Digital Rectal Inserts are made of SKINlike™ sturdy silicone to simulate human skin and tissue haptic during DRE and DRS
- Anus stays close and remains impenetrable after the removal of the catheter due to the high quality of the insert material
- Contains two 3D (three dimensional) anatomical didactic models of hemorrhoids to facilitate the explanation of complication or contraindication:
 - One displaying a rectum frontal section with hemorrhoids, anal fissures and fistulae
 - another of an external view with swollen anal prolapse and hemorrhoid knots
- The 3D models are attached to the model with magnet so the model can be passed from student to student during class
- Secure fluid reception reservoir system:
 - Ensures portability, impermeability, security
 - Administer standard enema solutions without risk up to a volume of 2 liters
 - Fluid can be drained into the reception reservoir or directly into a nearby sink or canister
 - Easy to clean
- Optimized design to enable a quick and simple installation for each procedure
- Includes a soft carrying bag and a storage box for the different consumables and inserts

Dimensions and weight: 3,8kg; 55cm long, 35cm large, 32cm high Delivery content:

- Bowel Care Trainer P16 by 3B Scientific
- Secure fluid reception reservoir
- 1 DRE, 1 DRS and 1 DRF insert
- 2 magnetic 3D anatomical models of Hemorrhoids
- Artificial solid stools (Bristol Stool Chart type I)
- Solid (150g) and soluble (60g) stool powder, artificial
- Dosage spatula and cup for stool preparation
- Bottle of concentrate blood (250ml), artificial
- Blood pipette injector

- Talcum powder (100g), Vaseline
- Plastic storage box for consumables
- Soft carrying bag
