Product Description

Developed from a live cast, this arm is unique to the industry. Its properties include veins that roll away or disappear as you attempt to catheterize the vessel and a specially developed skin that is exceptionally thin. If your students work with the aged, this adjunct to your teaching lab will enable them to better serve in the future.

	Phlebotomy	IM site	Subcutaneous injection	Intravenous bolus injection	Sterile technique	Infusion technique	Suture, incision and hemiodialysis site	Pressure squeeze bulb and clenched fist simulation	Simulation of collapsed veins	Replacement skin and veins

Geriatric IV Arm (1005777 [W44684] / 140-610U / PP00610U / SB40134U)

Developed from a live cast, this arm is unique to the industry. The Geriatric IV Arm (Item No. 1005777 [W44684], 5.508 kg, 91×36×23 cm) features veins that roll away or disappear as trainees attempt to catheterize the vessel, paired with a specially developed skin that is exceptionally thin — replicating the real challenges of IV access in elderly patients.

A meaningful addition for students working with aged patients. This adjunct to your teaching lab helps trainees better prepare to serve elderly patients in real clinical practice.

Comprehensive IV and injection skills covered: phlebotomy, IM site access, subcutaneous injection, intravenous bolus injection, sterile technique, infusion technique, suture/incision/hemodialysis site practice, pressure squeeze bulb and clenched fist simulation, and simulation of collapsed veins.

Replaceable skin and veins let institutions extend the working life of the arm without replacing the full unit.

Why Buy from SEM Trainers? SEM Trainers & Systems has over 30 years of experience supplying medical education resources to 1,500+ institutions across 28 states. We provide pan-India delivery and dedicated after-sales support.

Frequently Asked Questions

Q: What makes this arm suitable for training on elderly patients specifically? A: Veins that roll away or disappear during catheterization attempts, paired with exceptionally thin skin — replicating the real difficulty of IV access in aged patients.

Q: Can the skin and veins be replaced? A: Yes — replacement skin and veins are available separately.
