NENAsim® Infant ALS with Basic Software, Girl (1021105 / MXNENAINALSS2)

The NENAsim® series is an extremely realistic neonatal human patient simulator, with configurations for different training purposes — Basic Patient Care, Basic Life Support, Advanced Life Support, and advanced medical scenario and treatment training. Realistic anatomy, lifelike silicone skin, and flexible limbs are standard features across the whole NENAsim® range.

This configuration includes: realistic airway with intubation and oxygen delivery procedures, head tilt/chin lift/jaw thrust for CPR training, software feedback on CPR performance, and blood circulation vital signs.

Part of a five-tier NENAsim® Infant family, from Infant Care (basic patient care procedures) through Infant ALS (adds realistic airway and intubation), Infant ALS with Basic Software (this model — adds CPR software feedback and vital signs), Infant ALS with Advanced Software (adds spontaneous breathing and CPR compressions), up to the full Infant Human Patient Simulator (adds live defibrillation, ECG/12-lead display, palpable pulse points, auscultation sounds, wireless stethoscope, IV arm/IO leg, and head/eyelid movement).

Item No.: 1021105 (girl configuration); available in boy and girl versions across all five tiers.

Why Buy from SEM Trainers? SEM Trainers & Systems has over 30 years of experience supplying medical education resources to 1,500+ institutions across 28 states. We provide pan-India delivery and dedicated after-sales support.

Frequently Asked Questions

Q: What does "Basic Software" add over the standard Infant ALS? A: Software feedback on CPR performance and blood circulation vital signs.

Q: Is this available in a boy configuration too? A: Yes — every tier in the NENAsim® Infant line is available in both boy and girl versions.
