NENAsim® Infant Care, Girl (1021098 / MXNENAINC2)

The NENAsim® series is an extremely realistic neonatal human patient simulator, with configurations for different training purposes — Basic Patient Care, Basic Life Support, Advanced Life Support, and advanced medical scenario and treatment training. Realistic anatomy, lifelike silicone skin, and flexible limbs are standard features across the whole NENAsim® range.

This is the entry-level Infant Care tier, supporting core patient care procedures as the foundation of the NENAsim® Infant family.

Part of a five-tier NENAsim® Infant family, from this Infant Care tier (basic patient care procedures) through Infant ALS (adds realistic airway and intubation), Infant ALS with Basic Software (adds CPR software feedback and vital signs), Infant ALS+ (adds spontaneous breathing and CPR compressions), up to the full Infant Human Patient Simulator (adds live defibrillation, ECG/12-lead display, palpable pulse points, auscultation sounds, wireless stethoscope, IV arm/IO leg, and head/eyelid movement).

Item No.: 1021098 (girl configuration); available in boy and girl versions.

Why Buy from SEM Trainers? SEM Trainers & Systems has over 30 years of experience supplying medical education resources to 1,500+ institutions across 28 states. We provide pan-India delivery and dedicated after-sales support.

Frequently Asked Questions

Q: What's included at the Infant Care tier? A: Core patient care procedures — this is the entry point of the NENAsim® Infant family, without the airway management or software features of the higher tiers.

Q: Can I upgrade to a higher tier later? A: The NENAsim® Infant family spans five tiers of increasing capability — contact us to discuss which fits your program's training needs.
