Product Description

Quality CPR simulator designed to operate for years! Strong, sturdy construction with full-size, realistic landmarks and one piece disposable airways. Prewired for CPRLink™ for a first class BLS program. Features - Totally disposable airways to practice hygienic mouth-to-mouth ventilation - Fully articulating

head, neck, and jaw permitting head/tilt, chin lift, jaw thrust, and neck extension into the “sniffing” position - Airway blocked when head is forward - Easily accessible chest cavity with ribcage, lungs, and heart for realism and practice of the Heimlich maneuver - Realistic chest rise during ventilation - Carotid, femoral arterial pulse sites - Femoral venous site · Intramuscular (IM) Injection Sites on the deltoids, quadriceps and left gluteus medius - Eyes open and close; one pupil is dilated - OMNI® Code Blue® pack monitors and logs the cadence and depth of cardiac compression and airway ventilation - Jointed elbows, wrists, knees and ankles - 10 disposable airways - Detachable at waist for easy storage - Instruction Manual - Carrying bag

CPR Simon Full Body Simulator w/ OMNI® Code Blue Pack (1009220 [W45116] / S311.M)

The CPR Simon Full Body Simulator with OMNI® Code Blue Pack (Item No. 1009220 [W45116], MPN S311.M, 20.41 kg) is a quality CPR simulator designed to operate for years, with strong, sturdy construction, full-size realistic landmarks, and one-piece disposable airways — prewired for CPRLink™ to support a first-class BLS program.

Hygienic, realistic airway practice. Totally disposable airways allow hygienic mouth-to-mouth ventilation practice, while a fully articulating head, neck, and jaw permit head tilt, chin lift, jaw thrust, and neck extension into the “sniffing” position — with the airway blocking realistically when the head is forward.

A full chest for realistic technique. An easily accessible chest cavity with ribcage, lungs, and heart supports realism and practice of the Heimlich maneuver, with realistic chest rise during ventilation.

Comprehensive pulse and injection sites. Carotid and femoral arterial pulse sites, a femoral venous site, and intramuscular (IM) injection sites on the deltoids, quadriceps, and left gluteus medius.

Detailed visual assessment features. Eyes open and close, with one pupil dilated for pupillary assessment practice.

Built-in performance feedback. The OMNI® Code Blue® pack monitors and logs the cadence and depth of cardiac compression and airway ventilation, giving instructors objective performance data during training.

Comes ready for extended classroom use, with jointed elbows, wrists, knees, and ankles, detachable at the waist for easy storage, and supplied with 10 disposable airways, an instruction manual, and a carrying bag.

Why Buy from SEM Trainers? SEM Trainers & Systems has over 30 years of experience supplying medical education resources to 1,500+ institutions across 28 states. We provide pan-India delivery and dedicated after-sales support.

Frequently Asked Questions

Q: How does the OMNI® Code Blue® pack help with training? A: It monitors and logs the cadence and depth of cardiac compression and airway ventilation, giving instructors objective feedback on student performance.

Q: How many disposable airways are included? A: 10 disposable airways come supplied with the simulator.

Q: What's included? A: The simulator, 10 disposable airways, an instruction manual, and a carrying bag.
