SKU:

Categories:Ostomy Care

Product Description

This “two-in-one” simulator allows: • Catheterization: The interchangeable male and female genital organs feature a modular urethral valve to prevent fluid leakage. • Ostomy care: 3 stomas (transverse colostomy, ileostomy, suprapubic) may be dilated and allow practice of irrigation procedures as well as application of ostomy bags. Each stoma is connected to an internal tank. Supplied with carrying bag.

Male & Female Catheterization & Ostomy Care Simulator (1005806 [W45068] / S230.10.M)

The Male & Female Catheterization & Ostomy Care Simulator (Item No. 1005806 [W45068], MPN S230.10.M, 7.797 kg, 50.8×45.7×33 cm) is a "two-in-one" simulator combining both catheterization and ostomy care training in one unit.

Realistic catheterization training for both sexes. Interchangeable male and female genital organs feature a modular urethral valve to prevent fluid leakage, letting a single simulator support both male and female catheterization practice.

Comprehensive ostomy care training. Three stomas — transverse colostomy, ileostomy, and suprapubic — can be dilated, allowing practice of irrigation procedures as well as application of ostomy bags.

Realistic, repeatable function. Each stoma connects to an internal tank, supporting repeated hands-on practice sessions.

Comes ready for transport and storage, supplied with a carrying bag.

Why Buy from SEM Trainers? SEM Trainers & Systems has over 30 years of experience supplying medical education resources to 1,500+ institutions across 28 states. We provide pan-India delivery and dedicated after-sales support.

Frequently Asked Questions

Q: Can this simulator be used for both male and female training? A: Yes — interchangeable male and female genital organs allow catheterization practice for both.

Q: What ostomy procedures can be practiced? A: Dilation, irrigation, and ostomy bag application across three stoma types — transverse colostomy, ileostomy, and suprapubic.
