- Vaginal douching and pap smear exercises with realistic vagina and cervix
- Two spare bladder tanks
- Instruction Manual

Clinical Chloe™ Patient Care Simulator with Sculpted Stomas (1017542 [W45052] / S221.M)

The Clinical Chloe™ Patient Care Simulator with Sculpted Stomas (Item No. 1017542 [W45052], MPN S221.M, 15 kg) is the basic version of the Clinical Chloe™ line, giving nursing students hands-on practice across a wide range of core patient care skills.

Realistic head and airway features. Soft, lifelike face skin, a stylish wig, eyes seated in eyesockets for ophthalmic exercises, a movable jaw, and an ear canal for otic drops and irrigation, along with the ability to pass NP and OP tubes.

A body built to move like a real patient. Bends at the waist as in a human, with jointed elbows, wrists, knees, and ankles — and detaches at the waist for easy storage.

Injection site training. 360° intramuscular and subcutaneous injection sites in the upper arms, plus an intramuscular injection site in the buttock.

Full reproductive and ostomy care training. Interchangeable male and female breasts (the left breast contains a malignancy for palpation practice) and interchangeable male genitalia. A tricuspid valve permits male or female catheterization with soft silicone catheters. Students can practice transverse colostomy, ileostomy, and suprapubic procedures using quality internal, removable tanks,

along with enema administration and vaginal douching and pap smear exercises with a realistic vagina and cervix.

Comes ready for extended training use, supplied with two spare bladder tanks and an instruction manual.

Why Buy from SEM Trainers? SEM Trainers & Systems has over 30 years of experience supplying medical education resources to 1,500+ institutions across 28 states. We provide pan-India delivery and dedicated after-sales support.

Frequently Asked Questions

Q: How does this differ from the Advanced Clinical Chloe simulator? A: This basic version covers the same core patient care and ostomy skills but does not include the Advanced version's dedicated IV, IM, and sub-Q training arm.

Q: What ostomy procedures can be practiced? A: Transverse colostomy, ileostomy, and suprapubic procedures, using quality internal, removable tanks.
