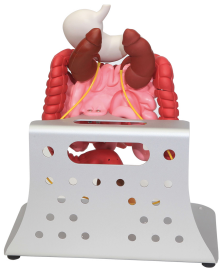
Categories: Ostomy Care



Product Description

Otto Ostomy™ Advanced Model is the ideal model for training patients and healthcare professionals on basic anatomy as well as what changes might occur with a stoma.

- Molded from a patient's CT scan, this model features 3D, removable, and color-coded urinary and digestive tracts.
- Helps healthcare providers better explain ostomies and patients understand their stomas.
- Ideal for demonstrating an end or loop ileostomy and colostomy, urostomy, and gastrostomy tube placement.

The more healthcare providers understand ostomies, the better they will be able to educate and encourage their patients about this life-changing event. Seeing the 3D digestive and urinary tracts and visualizing the location and function of the various organs is essential to learning, especially in those cases where cognitive processes or language may be an obstacle. The color coded organs displayed include: Stomach, Small Intestine, Large Intestine, Rectum, Kidneys, Ureters and Bladder.
Demonstrate an end or loop ileostomy and colostomy, urostomy and gastrostomy tube placement.

Otto Ostomy™ Advanced Model is supplied with 18 stomas.
Soft-sided carrying case included.
