"Thin Man" - Sequential Human Anatomy Program

Item No. 1005548 [W42532]

Weight 3.49kg

Dimensions 160 cm

MPN: 0700-00

[Read More](#)

SKU:

Categories:Skeletal System

Product Description

Explore the human body layer-by-layer by peeling away transparent mylar overlays. Displayed on the rear view of the Thin Man is a full-figure diagram of the skeletal and nervous systems. Over 200 anatomical features are named, indexed, and keyed in this amazingly detailed anatomical chart. The layers of the Thin Man poster display the following systems: • 1st layer - Musculature of the head, neck, thorax and abdomen • 2nd layer - Brain, thyroid and salivary glands, eye, tongue, teeth, heart and major vessels, lungs, stomach, liver and intestines • 3rd layer - Sinuses, nasal, septum, tongue, trachea, heart, chambers, and vessels, pancreas, spleen, large intestine • 4th layer - Esophagus, pleura, aorta, inferior vena cava, intercostal vessels and nerves, autonomic nerve trunk, kidneys and adrenal glands • 5th layer (full figure) - Brain, pharynx, vertebral column, rib cage, muscles of upper and lower extremities, pelvic organs and muscles This anatomical poster is a great way to learn the

systems of the human body...almost like having a set of anatomy flashcards for every system of the human body condensed into one detailed chart. Item includes metal stand.

"Thin Man" — Sequential Human Anatomy Program (W42532)

The "Thin Man" Sequential Human Anatomy Program (Item No. 1005548 [W42532], 3.49 kg, 160 cm) lets students explore the human body layer-by-layer by peeling away transparent mylar overlays, with a full-figure diagram of the skeletal and nervous systems displayed on the rear view.

Over 200 anatomical features, indexed for easy reference. Every structure across all five layers is named, indexed, and keyed in this amazingly detailed anatomical chart — functioning almost like a set of anatomy flashcards for every system of the human body condensed into one poster.

Five distinct layers, each revealing a different body system. Layer 1 shows musculature of the head, neck, thorax, and abdomen. Layer 2 reveals the brain, thyroid and salivary glands, eye, tongue, teeth, heart and major vessels, lungs, stomach, liver, and intestines. Layer 3 shows sinuses, nasal septum, tongue, trachea, heart chambers and vessels, pancreas, spleen, and large intestine. Layer 4 uncovers the esophagus, pleura, aorta, inferior vena cava, intercostal vessels and nerves, autonomic nerve trunk, kidneys, and adrenal glands. The full-figure fifth layer shows the brain, pharynx, vertebral column, rib cage, muscles of the upper and lower extremities, and pelvic organs and muscles.

Comes ready to display, including a metal stand.

Why Buy from SEM Trainers? SEM Trainers & Systems has over 30 years of experience supplying medical education resources to 1,500+ institutions across 28 states. We provide pan-India delivery and dedicated after-sales support.

Frequently Asked Questions

Q: How many anatomical layers does this chart have? A: Five progressive mylar overlay layers, revealing different body systems from surface musculature down to full skeletal and organ structure.

Q: How many anatomical features are labeled? A: Over 200, all named, indexed, and keyed for study reference.

Q: What's included? A: The layered anatomical chart and a metal stand for display.
