corpuls® AED Defibrillator Screen Simulation for REALTi360

Item No. 8000968

Brand iSimulate

MPN: M-SCPAED

[Read More](#)

SKU:

Categories: Patient Monitor Simulators

Product Description

The simulated patient monitor “corpuls® AED” is an optional premium branded screen simulation that works with the REALTi360 vital sign monitor and defibrillator app. It is designed to be used with the patient monitor simulation systems REALTi Plus and REALTi Pro by iSimulate.

Instructors can easily add training scenarios or download new scenarios from the REALTi360 COMMUNITi platform.

REALTi360 Premium Screens mimic the user interface of several leading patient monitor and defibrillator manufacturers. Through collaboration with popular defibrillator and monitor manufacturers, iSimulate has created hyper-realistic interfaces which look and work like the real vital sign monitors and

defibrillators used at the point of care. The current and growing selection of patient monitors and defibrillators allows students to experience a significant number of monitors and defibrillators that they might encounter in their EMT or Hospital careers.

Based on individual training needs and the product configuration, users can select one or more of these Premium Display Screens for their simulation trainings.

The patient monitor simulation of “corpuls® AED” gives REALITi360 users the option to train qualified first responders in basic patient monitoring and defibrillation with a perfectly mimicked screen of “corpuls® AED” including all of its branded features.
