Product Description

The fetal monitoring and labor progress model set provides students with a realistic simulation of vaginal examinations, labor progress and insertion of the intrauterine pressure catheter. This fetal and labor model set is an excellent tool for teaching nursing, medical, or midwifery students. This lifelike 3D

model includes:

- Fetal head
- Lower uterine segment
- Cervix
- 4 Interchangeable cervical dilation models

The fetal monitoring and labor progress model set is a great addition to any lesson about the human birth process.

Fetal Monitoring and Labor Progress Model Set (1005579 [W43045] / 79851)

The fetal monitoring and labor progress model set (Item No. 1005579 [W43045], MPN 79851, 5.151 kg, 34×16×29 cm) by WRS Group provides students with a realistic simulation of vaginal examinations, labor progress, and insertion of the intrauterine pressure catheter.

An excellent tool for a range of training programs, well suited for teaching nursing, medical, or midwifery students.

A lifelike 3D model set, including a fetal head, lower uterine segment, cervix, and 4 interchangeable cervical dilation models — letting trainees track cervical progress through multiple stages of labor.

A great addition to any lesson about the human birth process.

Why Buy from SEM Trainers? SEM Trainers & Systems is an authorised distributor of WRS Group products in India with over 30 years of experience supplying medical education resources to 1,500+ institutions across 28 states. We provide pan-India delivery and dedicated after-sales support.
