Product Description

for W45025 Representation of a 42 cm fetus with articulating head and neck, shoulders, elbows, hips and knees for more realistic practice of difficult delivery exercises such as Leopold's or Ritgen's maneuvers. Features include:

- Realistic mouth and nostrils for simulated suctioning
- Palpable fontanelles, spine, shoulders, buttocks, elbows, and knees

Supplied with carrying bag.

Articulating Fetus (1005814 [W45110] / S500.5.M)

The Articulating Fetus (Item No. 1005814 [W45110], MPN S500.5.M, 2.5 kg) is a

replacement/accessory part for the simulator W45025.

A 42 cm fetus built for realistic delivery practice. Fully articulating at the head and neck, shoulders, elbows, hips, and knees, supporting more realistic practice of difficult delivery exercises such as the Leopold or Ritgen maneuvers.

Realistic features for hands-on assessment. A realistic mouth and nostrils support simulated suctioning, while palpable fontanelles, spine, shoulders, buttocks, elbows, and knees allow trainees to practice full physical assessment technique.

Comes complete with: a carrying bag.

Why Buy from SEM Trainers? SEM Trainers & Systems has over 30 years of experience supplying medical education resources to 1,500+ institutions across 28 states. We provide pan-India delivery and dedicated after-sales support.

Frequently Asked Questions

Q: What size is this fetus model? A: 42 cm.

Q: What maneuvers can be practiced with this model? A: Difficult delivery exercises such as the Leopold and Ritgen maneuvers, thanks to its full articulation.
