Product Description

This birthing simulator is especially designed to demonstrate and practice the palpation of the birth canal. It shows the relationship between fetal head and ischial spines of the pelvic bone during birth. A simulated fetal head of the birth simulator can be locked in three different stations to demonstrate its position above, between and below the ischial spines. This anatomical birthing model is a great addition to any lesson about the human birth process. The birthing simulator is delivered with storage case. It is great for any gynecological and birth training.
Birthing Station Simulator (LF01070U)

This birthing simulator (Item No. LF01070U, 8.62 kg, 58.5×46×33 cm) by Nasco Healthcare, USA is especially designed to demonstrate and practice palpation of the birth canal.

Shows the critical relationship between fetal head and pelvis. It shows the relationship between the fetal head and the ischial spines of the pelvic bone during birth, helping trainees connect palpation findings to fetal descent.

Three lockable stations for precise position training. A simulated fetal head can be locked in three different stations to demonstrate its position above, between, and below the ischial spines.

A great addition to any birth process lesson, well suited for gynecological and birth training programs.

Comes complete with: a storage case.
