Product Description

Now with new lifelike skin for the most realistic suturing practice! These new and improved Life/form® Episiotomy Suturing Simulators provide a realistic way for students to learn good surgical techniques. The simulators provide students with a variety of repair experiences without the constraint of time and concern for safety, which are factors with a live patient. The simulators can be used by the student in a learning lab with an instructor, or by the student individually in the clinical setting just prior to a patient experience. They are also useful as homework teaching aids that can be signed out at night and returned the next day. In addition to being portable, the lifelike texture allows the learner to develop a “feel” for instrument handling, tension on suture, and the advantages of one method of tying knots over another. Includes one of each simulator: • Midline Suture Simulator (W44415) • Left Mediolateral Suture Simulator (W44416) • Right Mediolateral Suture Simulator (W44096RM) Each simulator comes with an instruction booklet and is individually boxed. Why Choose the Episiotomy Suturing Simulator Set Of 3 for Your Simulation Lab in India? The Episiotomy Suturing Simulator Set Of 3 from 3B

Scientific is a trusted training tool used across simulation labs in India for hands-on episiotomy suturing practice. This simulator helps medical students and healthcare professionals build critical competencies in a safe, controlled environment — fully aligned with NMC's CBME curriculum for obstetrics and gynecology practical training. Who Is This Simulator Ideal For? This product is recommended for obstetrics and gynecology departments, nursing colleges with midwifery programs, and government hospitals mandated to provide EmOC (Emergency Obstetric Care) training. Whether you are setting up a new simulation lab or upgrading your existing facility, the Episiotomy Suturing Simulator Set Of 3 offers an excellent balance of realism, durability, and training value.
