C-Section Fetal Extraction Trainer – C-Celia

Item No.	1022559
Weight	38kg
Dimensions	60 x 50 x 27 cm
Brand	Operative Experience Inc.
MPN:	OB-500-2000
Previous Item No.	1021386

Categories: Obstetrics

Product Description

Extremely **realistic obstetric simulator for fetal extractions at Cesarean deliveries**: Obstetric surgery skills and procedural training can be true-to-life with the C-Celia suite of birthing simulators. The material used in the simulator feels life-like (no hard plastics), is very durable and easy to clean. The Fetal Extraction Simulator **features**:

- Open (post C-section) abdomen simulator to imitate a **true-to-life experience** for difficult fetal extractions at Cesarean deliveries
- Post C-section: Low-transverse incision and uterus with a low transverse hysterotomy enable **various extraction maneuvers and techniques** including suction assist and forceps

- Extremely **durable material** supports countless delivery trainings
- **Realistic anatomy enables hands-in-the-body simulation**

Fetal extraction methods to assist with the Cesarean delivery include:

- Manual delivery utilizing fundal pressure
- Vacuum assisted extraction
- Forceps extraction

Difficult fetal presentations can be manually positioned by the instructor to simulate the fetal extraction scenario that needs to be trained by the obstetricians and the medical team. Common difficult C-section fetal extraction scenarios include for example:

- Cord prolapse
- Single footling breech
- Prolapsed arm
- Triple nuchal cord
- Transverse lie

Delivery content:

- Lubricant gel
- 1 set of twin babies
- Open abdomen C-section simulator and uterus

C-Celia Feature Comparison: The following guide gives you an overview of C-Celia's obstetric simulation features for difficult Cesarean deliveries.

C-Celia: Complete Obstetric Training System for Cesarean Deliveries				
	Obstetric Simulator for Complete Cesarean Delivery 1022567	Obstetric Simulator for Fetal Extractions at Cesarean Deliveries 1022559	Obstetric Simulator for Postpartum Hemorrhage (PPH) Control 1022561	Obstetric Simulator for Cesarean Emergency Hysterectomy 1022564
C-section delivery stage:	Pregnant abdomen, pre C-section	Open abdomen with transverse Cesarean incision	Open, post C-section delivery abdomen	Open, post C-section delivery abdomen

Cesarean delivery skills trained:	Emergency Cesarean delivery with: • Full transverse (Pfannenstiel incision) C-section • Vertical emergency C-section (running from the umbilicus to the symphysis pubis C-Section through abdominal wall and uterus with incisions through: • Abdominal wall • Muscle • Fascia • Linea alba • Uterus • Amniotic sack	Difficult Cesarean delivery maneuvers: • Manual delivery utilizing fundal pressure • Vacuum assisted extraction • Forceps extraction	• Management of Postpartum Hemorrhage (PPH) after Cesarean delivery • Repair of complex lacerations and uterine artery injuries • Supports PPH control techniques like Bakri Balloon, B-Lynch suture, Hayman suture and O-Leary Stitch • Surgical PPH control: Compressive uterine sutures, uterine artery ligation, hypogastric artery ligation • Non-surgical PPH control: uterine fundal massage, bimanual uterine massage, uterine packing, uterine tamponade, external aortic compression	Postpartum and Caesarean hysterectomy: • Hemorrhage control • Clamping and cutting of uterine art • Fully operable removal of uterus
Obstetric simulator features:	• Includes twin babies (with umbilical cord and placenta) • Simulated amniotic fluid	• Includes twin babies (with umbilical cord and placenta)	• Integrated pressurized bleeding and lubrication system	• Contains uterus, bladder, ureters and detailed representation of uterine arteries

C-Section Fetal Extraction Trainer – C-Celia (1022559 / OB-500-2000)

Extremely realistic obstetric simulator for fetal extractions at Cesarean deliveries. The C-Celia suite of

birthing simulators (Item No. 1022559, MPN OB-500-2000, 38 kg, 60×50×27 cm) by Operative Experience Inc. brings obstetric surgery skills and procedural training to life. The material used feels lifelike (no hard plastics), is very durable, and easy to clean.

Key features of the Fetal Extraction Simulator:

- Open (post C-section) abdomen simulator imitating a true-to-life experience for difficult fetal extractions at Cesarean deliveries
- Post-C-section low-transverse incision and uterus with a low transverse hysterotomy, enabling various extraction maneuvers and techniques including suction assist and forceps
- Extremely durable material supports countless delivery trainings
- Realistic anatomy enables hands-in-the-body simulation

Three fetal extraction methods trained, assisting with the Cesarean delivery: manual delivery utilizing fundal pressure, vacuum-assisted extraction, and forceps extraction.

Difficult fetal presentations can be manually positioned by the instructor to simulate the exact extraction scenario obstetricians and the medical team need to train for, including cord prolapse, single footling breech, prolapsed arm, triple nuchal cord, and transverse lie.

Comes complete with: lubricant gel, 1 set of twin babies, and the open abdomen C-section simulator with uterus.

Part of the complete C-Celia obstetric training system for Cesarean deliveries, alongside the Emergency C-Section Delivery Trainer (pre-C-section stage), the Postpartum Hemorrhage Control Trainer (PPH management post-delivery), and the Emergency Hysterectomy Trainer (fully operable uterus removal) — contact us to discuss the full suite.

Why Buy from SEM Trainers? SEM Trainers & Systems is an authorised distributor of Operative Experience Inc. products in India with over 30 years of experience supplying medical education resources to 1,500+ institutions across 28 states. We provide pan-India delivery and dedicated after-sales support.

Frequently Asked Questions

Q: What fetal extraction techniques can be practiced? A: Manual delivery utilizing fundal pressure, vacuum-assisted extraction, and forceps extraction.

Q: What difficult presentations can be simulated? A: Cord prolapse, single footling breech, prolapsed arm, triple nuchal cord, and transverse lie — all manually positioned by the instructor.

Q: What's included? A: Lubricant gel, a set of twin babies, and the open abdomen C-section simulator with uterus.
