Vein Set with Umbilical Valve

Item No.	1009800 [W46505/1]
Weight	0.00kg
Dimensions	25.4 x 20.3 cm
Brand	VATA
MPN:	1805

Product Description

New vein set with umbilical valve attached - Latex Free. For use with W46502/1 The Vein Set with Umbilical Valve (Item No. 1009800 [W46505/1] | MPN: 1805) by VATA is a high-quality replacement vein set featuring an integrated umbilical valve, designed for use with the VATA neonatal training manikin model W46502/1. Measuring 25.4 x 20.3 cm, this latex-free vein set is an essential consumable for medical training institutions, neonatal ICUs, nursing institutes, and simulation labs focused on neonatal IV cannulation and umbilical vascular access training. The latex-free design makes it safe for use in environments with latex sensitivity concerns. Replacing the vein set with a genuine VATA component ensures continued realistic, accurate, and safe vascular access training on the compatible neonatal trainer.

Q1. What is the Vein Set with Umbilical Valve used for? It is a replacement vein set with an

attached umbilical valve, designed for use with the VATA neonatal training manikin (W46502/1) to support realistic neonatal IV cannulation and umbilical vascular access training.

Q2. Which trainer is this vein set compatible with? This vein set is specifically designed for use with the VATA neonatal trainer model W46502/1. Please verify compatibility with your specific trainer model before ordering.

Q3. Is this vein set latex-free? Yes, this vein set is fully latex-free, making it safe for use in training environments where latex sensitivity or allergy is a concern among trainees or instructors.

Q4. What is the significance of the integrated umbilical valve? The umbilical valve allows trainees to practice umbilical vascular access procedures — a critical neonatal emergency skill — directly on the same vein set, combining peripheral IV access and umbilical catheterization training in one component.

Q5. When should the vein set be replaced? The vein set should be replaced when it shows signs of wear, puncture damage, leakage, or reduced performance during IV cannulation and umbilical vascular access training exercises.

Q6. What are the dimensions of this vein set? The vein set measures 25.4 x 20.3 cm, making it appropriately sized for the compatible VATA neonatal training manikin.

Q7. Who manufactures this product? It is manufactured by VATA — a trusted brand in neonatal and pediatric medical simulation training equipment.

Q8. Who is this product ideal for? It is ideal for medical colleges, nursing institutes, neonatal ICUs, pediatric simulation labs, and healthcare training centers that use the VATA neonatal trainer (W46502/1) for IV access and umbilical catheterization skills training.

Q9. Where can I purchase this in India? You can enquire and order through SEM Trainers at **+91-88495 63724** or **+91-98791 03905**, or visit semtrainers.com.
