SKU:

Categories: Injections and Punctures

Product Description

Features

- Prominent venous network
- Simulated cephalic, basilic, antecubital, radial, and ulnar veins.
- Simulation of infusion technique
- Blood collection exercises with simulated blood
- Administration of medication by intravenous bolus
- Simulation of clenched fist or tourniquet position.
- Simulation of collapsed veins
- Realistic “pop” as needle enters vein

- Resealing veins and outer skin
- Smoked Lucite base with stand
- Soft carrying bag
- Set-up kit with simulated blood concentrate, pressure bulb, Blood dispensing bag, spare arm skin, funnel, and talcum powder.
- Instruction manual

	Phlebotomy	IM site	Subcutaneous injection	Intravenous bolus injection	Sterile technique	Infusion technique	Suture, incision and hemiodialysis site	Pressure squeeze bulb and clenched fist simulation	Simulation of collapsed veins	Replacement skin and veins

Same recurring 3bscientific.co.uk comparison table (seventh instance, no need to re-detail). Good, feature-rich product content otherwise, no data conflicts.

[Cert] Item No. 1018755 [W45163], weight 2.1 kg, MPN S400R.M. Simulated veins: cephalic, basilic, antecubital, radial, and ulnar. Genuinely comprehensive feature set matching the pattern of the most complete IV trainers this session: infusion technique, blood collection with simulated blood, IV bolus administration, clenched-fist/tourniquet positioning, collapsed-vein simulation, and a resealing skin/vein system for repeated use.

DESCRIPTION (copy-paste into WordPress) — comparison table intentionally omitted, same recurring 3bscientific.co.uk linking issue as prior products this session:

Why Choose the Intravenous Training Arm for Your Nursing Skills Lab in India?

The Intravenous Training Arm (Item No. 1018755 [W45163], 2.1 kg, MPN: S400R.M) offers a prominent, realistic venous network across five clinically relevant sites — cephalic, basilic, antecubital, radial, and ulnar veins — giving students comprehensive site-selection and access practice.

Students can practice the full IV workflow: infusion technique, blood collection exercises with simulated blood, intravenous bolus medication administration, and proper clenched-fist or tourniquet positioning before venipuncture. A squeeze bulb lets instructors simulate collapsed veins, and students feel a realistic "pop" as the needle enters. Both the outer skin and veins are self-resealing, supporting extended repeated use across many training sessions.

Includes: Smoked Lucite® base with stand, soft carrying bag, set-up kit (simulated blood concentrate, pressure bulb, blood dispensing bag, spare arm skin, funnel, talcum powder), instruction manual.

Why Buy from SEM Trainers? SEM Trainers & Systems is an authorized distributor of leading clinical skills training equipment in India, with over 30 years of experience supplying medical simulators and clinical skills training equipment to 1,500+ institutions across 28 states. We provide pan-India delivery and dedicated after-sales support.

Frequently Asked Questions

Q: Which veins are represented? A: Cephalic, basilic, antecubital, radial, and ulnar.

Q: Can venous pressure be adjusted to simulate collapsed veins? A: Yes — a squeeze bulb allows this during training.

Q: How do I order from SEM Trainers? A: Contact us at sem@semtrainers.com or call +91-88495 63724 for pricing and availability.
